

About

# Venta Slate

The Venta range from JRC offers great quality slate at affordable pricing. Sourced exclusively from Spain, the Venta range is functional, aesthetically pleasing, and very cost-effective.

We're proud to say that all our slates attain the highest possible classification. We believe that this guarantee of quality is part of what sets us apart from other slate suppliers, which is why we're so keen on the testing process.

Every slate in the Venta range is tested to the same rigorous standards under British and European Standard BS EN 12326.

Venta slates perform exceptionally well under almost any circumstances. These slates are highly weather-resistant, which makes them ideally suited to the UK market. They are also fire and pollution resistant, so they perform much better in conditions such as acid rain than other roofing products.

The quality of our products helps to bring peace of mind to the architects and specifiers who insist on our Venta slate. We're also happy to say that we work hard to minimise the carbon footprint of all our roofing slate, so that we're doing our part for the environment. Our natural roofing slate goes through almost no processing, unlike man-made fibre cement and concrete tiles, and as a consequence it has a much smaller carbon footprint.

Our Venta slates provide an aesthetically-pleasing finish. Their dark colour and textured surface makes an ideal accompaniment to properties both residential and commercial. Our slates are also suitable for use in any UK market.

Our slates are very uniform, which makes them easy to sort and grade. Being so rigorously tested, they are guaranteed to perform year after year when fitted in accordance with BS 5534. They also come with a quarry-backed guarantee, so you can be sure that you're getting a quality product, every time.
