

Keyflow® Nurture®

Pre-digested Hi Fibre Stud Feed

Perfect for:

- Dry Mares, In-foal Mares and Lactating Mares
- Foals and Weanlings
- Yearlings and Yearling Prep
- 2YO's in pre-training & training
- Stallions
- Any horse which requires musculature development and growth
- Horses that have restricted access to pasture

Key Points:

- Scientifically formulated hi-fibre developmental feed
- Pre-digested (steam extruded) to allow for maximum nutrient absorption
- Low in sugar & starch with no molasses
- Highly palatable in large nuggets that are easily eaten off the ground
- Contains the long chain omega 3 fatty acid DHA which helps support semen mobility, mare postpartum recovery, early feeding behaviours and on going foal development.
- Nurture® has an amino acid profile carefully matched to the horses to support growth and development of the soft tissue and bone.
- Designed to be fed at lower feeding rates than traditional stud feeds

Fully Steam Extruded

High Fibre

DHA Omega 3

Low Sugar & Starch

EQ-Amino Pack

Product Summary

Nurture® is a scientifically formulated hi-fibre feed for stud horses as well as any horse that requires extra musculature and skeletal development and growth. Nurture® is low in sugar and starch it has been pre-digested through steam extrusion allowing maximum nutrient absorption and therefore a lower feeding rate, making it more economical to feed than traditional stud products. Containing long chain Omega 3 fatty acid, this supports semen motility, mare postpartum recovery as well as foal development and behaviour. Nurture® is a large nugget which is designed to be easily picked up off the floor, chewed and digested.

Ingredients

Pressure cooked and fully steam extruded fibre & protein meals, (inclu. soya hulls, alfalfa, rapeseed, full fat soya), steam extruded cereal & omega 3 meals (inclu. wheat, rapeseed & linseed), cold pressed rapeseed oil (omega 3), heat stable vitamins & chelated minerals, vegetable source DHA (docosahexaenoic acid).

Analysis

Energy De	12Mj/kg
Starch	12%
Sugars	3.2%
Protein	16.5%
Oils	7.5%
Fibre	20%
Ash	9.4%
Copper	52 mg/kg
Vit A	12,000 IU/kg
Vit D	1200 IU/kg
Vit E	363 IU/kg

Daily Feeding Guide

Dry mares, Foals/Weanlings, Yearlings,
400g per 100kg of b/w

Yearling Prep and 2YOs
500g per 100kg of b/w

Working/Covering Stallions In-foal mares Horses
requiring extra musculature development
600g per 100kg of b/w

Lactating mares
800g per 100kg of b/w

Introduce Nurture® into the diet gradually over a minimum of 7 days, dietary changes should be made gradually. Total roughage offered should be between 1-2% of bodyweight daily. Fresh clean water must be made available at all times. Feeding quantities above are a guide only, Nurture® should be fed as part of a balanced diet.
