Horizon Light, Bright & Ultrasoft bring:

- Bacteria and spore kill at low temperatures
- Excellent cleaning and de-staining
- Significant energy and cost savings

#### Bacteria and spore kill at low temperatures

The **Horizon Light, Bright & Ultrasoft** system has been extensively tested and is effective against harmful bacteria strains including **MRSA** at 40°C. Even the notoriously difficult to kill spores of **Clostridium difficile** are effectively destroyed at 60°C.

#### Excellent Cleaning and de-staining

Horizon Bright contains a special active ingredient which is activated at a pH of 9 to 10 and does not require high temperatures to be effective. Horizon Light and Bright in combination deliver the highest cleaning quality in unusually mild conditions, extending the fabric life by up to 50%.

A completely non-corrosive system, with no unpleasant vapours makes the Horizon Light, Bright & Ultrasoft system pleasant and safe to use, ideal for companies where people come first.

# A New Generation of Laundry Technology

The Horizon Light, Bright and Ultrasoft system comprises of three unique products.

**Horizon Light** is a non-corrosive detergent for use on delicates. Used alone, without Bright and Ultrasoft, as a one product system, Horizon Light is **suitable for use on microfibre**. Average dose is 10ml/kg.

*Product code: 6000832. Pack size: 10L. Bar code: 5011888037748*

**Horizon Bright** gives the system its exceptional destaining and decontaminating properties. Based on a novel technology this destainer removes stubborn stains and passes EN1276 at 40°C, killing MRSA in the wash.

At 60°C Bright passes EN13704, killing Clostridium difficile spores in the wash and reducing the risk of cross contamination. Minimum dose is 4ml/kg.

*Product code: 7515126. Pack Size: 10L. Bar code: 7615400070992*

**Horizon Ultrasoft** is a concentrated fabric softener suitable for most fabrics. Its concentrated solution minimises packaging waste and its refreshing fragrance keeps fabrics feeling and smelling great. Please note that softeners should not be used on microfibre. Average dose is 5ml/kg.

*Product code: 6000841. Pack size: 10L. Bar code: 5011888037694*

For use with JohnsonDiversey's Professional Autodosed Laundry System.

The Horizon Light, Bright and Ultrasoft system is effective against:

Staphylococcus aureus  
Enterococcus hirae  
Eschericia coli  
Pseudomonas aeruginosa  
Methicillin Resistant Staphylococcus aureus  
Clostridium difficile spores

## What are EN1276 and EN13704?

These EN tests are European test methods that prove that the Horizon Light, Bright and Ultrasoft system kills many bacteria strains including MRSA and the spores of Clostridium Difficile.

## Top Tips

- Always check the care label.
- Sort your washing into whites, light colours and dark colours and then by fabric groups.
- Keep clean and dirty washing separated.
- Never overload the machine as this may result in poor wash results and damage to the garments.
- Always use the correct product dose according to water hardness and soil level.
