## No waves: CMC navy and the new range of stabilizers waveless

A success for CMC Marine announced that Cannes has its world premiere waveless by CMC Marine, stabilizers designed for boats over 12 meters in length. The new range of ultra-compact electric stabilizers has small dimensions, the smallest model of **waveless by Marin CMC** and, in fact, has a footprint on board equal to 38 centimeters in diameter for 22 centimeters in height.

**Designed for medium to large boats the waveless by CMC Marine** boasts the same technology as other CMC stabilizers, always a guarantee of efficiency and stability.

*"By transferring the advanced know-how and manufacturing experience to this new family of stabilizers, CMC Marine aims to solve the problem of rolling and pitching of the yacht caused by the waves and movement of weights on board, thus making their stay in the boat more comfortable,"* said **Alessandro Cappiello**, Founder and President of CMC Marine.

The family **waveless by CMC Marine** has four models of stabilizers **STAB** and 4 intruder models **TRIM**.

*"Waveless by CMC Marine is to expand the supply of electric stabilizer CMC Marine offering a new product highly efficient, fully electric and very small that has the same technology of fins mounted on larger boats much larger,"* said **Peter Cappiello**, CMC Marine Strategy Manager, which followed the study and development of the waveless project in all its phases.

CMC Marine so growing and consolidating its market leading position in the industrial segment of the stabilization systems, steering systems and bow thrusters for yachts and passenger ships over 16 meters and imposing its presence on the market by 12 meter boats.

The technical approach, careful planning and the ability to ensure high performance are the characteristics of a range of innovative, flexible and reliable, already installed hundreds of yachts in the world, twenty-backed company with 40 employees most technical.
