K - Technical Specifications

K is our small and flexible refuse collector, designed for a chassis with a gross weight of 6-18 tonnes. It is ideal for lightweight refuse and household refuse. The lightweight chassis with its lower footboard gives the driver a comfortable work environment. K is the perfect refuse collector for movement-restricted areas. The popular K comes in several sizes and with ample extras.

K-Mini and K-Midi are the smallest among the K models. The largest is K-Maxi, designed for a chassis with a gross weight of between 12 and 18 tonnes.

Load volume (net)	4-14 m ³
Body weight including bin lift	2700-3500 kg
Height above chassis frame	1615, 1815, 1965 mm
Width	2040-2430 mm
Total length	4100 - 5600 mm
Loading height, minimum	1000 mm
Compaction force	142 kN (14,25 tonnes)
System pressure	190 bar

Optional:

- Footboards
- Automatic compaction cycle
- Lever for bin lift on the left side
- Semi-automatic bin lift
- Hydraulic oil heater
- Auto lube
- Weighing equipment
- Sack lift
- Bio equipment
- Different box alternatives
- Dust-free emptying of bins
- Side access door
- Variable pump

Standard equipment:

- Bin lift
- Pneumatic bin catcher bar
- Proportionally controlled hydraulic levers for the bin lift
- Dual circuit manual override controls
- Cleaning of packer plate when emptying
- Rear view camera
