

Celebrating 15 Years of Paper Shredding Services

May 2015

Paper Shredding Services are celebrating their delivery of secure document shredding and recycling services for fifteen years now.

The business has gone from one vehicle and two staff operating out of a small office to a fleet of vehicles operating out of their 10,000 sq ft depot in Glasgow that has modern shredding and baling equipment installed.

The company's long serving staff deliver secure shredding services to domestic and business customers, large and small, throughout Scotland and the north of England.

The Complete Shredding Service

In the last 15 years we have developed and now offer services that are not just limited to shredding paper items but include media that contains sensitive information such as CDs, DVDs, hard drives, memory sticks, bank and credit cards, etc.

We also supply recycling bins, bags, cabinets and large containers to businesses.

Each year we deliver hundreds of tonnes of paper to UK paper mills for recycling.

Shredding to Industry Standards

Paper Shredding Services has established an excellent reputation within the paper shredding industry. We are ISO 9001 and 14001 accredited and all on and offsite shredding of documents is carried out in accordance with BSEN 15713.

If you would like more information about our shredding and recycling services please contact us on 0800 071 4000.
