

Cookie Policy

A cookie is text file containing anonymous information that includes a unique user identification and website name.

A cookie may be placed in your browser when you visit a website, and each individual website can only view only the cookies it has stored on your computer.

Cookies are used to improve your web browsing experience by storing your data anonymously. There are two types of cookie: Session cookies which relate to a single visit to a website and persistent cookies which relate to repeated visits to a website.

Some cookies are needed for features of a website to work effectively. These are referred to as "essential cookies". "Non-essential cookies" are used to enhance your browsing experience.

You can adjust your browser settings to accept, reject all, or block selected cookies. You can also change your browser settings to notify you whenever a cookie is in use. Click [here](#) for more information about cookies.

You can delete your browser cookies by following the instructions [here](#).

Please note that your browsing and shopping experience may be affected should you choose to block or delete cookies
