

Project: 10 Manchester Street Hotel

Client: Arab Investments

Sector: Hotels / Hospitality

Duration: 11 Months

10 Manchester Street Hotel in Marylebone London is a 45 bedroom Boutique Hotel.

NM Cabling was tasked with the Structured Cabling installation, Audio Visual Installation, WIFI Installation and Telephone System Installation when the Hotel was refurbished

NM Cabling was also the overall project management team for the technical package for the hotel liaising with and managing all technical installations alongside the structured cabling installation

### Structured Cabling Installation

Data cabling was required throughout the hotel for Guest Bedroom, Public Areas, Offices, Bar, Restaurant and Reception.

Due to the nature of the old building, bespoke routes and solutions were required for the data cabling installation and terminations.

The network cabling was undertaken for all services within the building

### Audio Visual Installation

NM Cabling installed large screen televisions in every bedroom with audio visual links for guest connection, distributed aerial systems, data systems and digital signage to link back to the hotels management system.

In the public areas distributed music systems with zonal control and inputs were installed

### IT / Telecoms Equipment

NM Cabling headed the project management for the installation and setup of the IT and Telephone systems throughout the hotel. Initially installing the data cabling for these systems, the company then rolled out the equipment into the rooms for the connection and setup by the hotels IT partners

### Wi-Fi Installation

A free to access Wi-Fi system was installed through all guest bedroom, public and hotel management areas,

The data cabling installation, mounting and setup of the WI-FI units were all undertaken by NM Cabling
