PRICES VALID FOR 90 DAYS AFTER JANUARY 1, 2019

MADE IN THE USA

MESA TACTICAL

In 2019, Mesa Tactical will celebrate its 16th year in business. In a decade and a half, our little company changed how American law enforcement agencies equip themselves, producing over 150,000 of our revolutionary SureShell shotshell carriers for agencies large and small, as well as private citizens. We also develop and market some of the highest quality tactical buttstock assemblies, including our LEO stock adapters and Urbino fixed tactical stocks.

While we continue to focus on innovative ideas to enhance the tactical shotgun, including our exciting new Truckee™ forends for the Benelli M4 shotgun (see page 4), this year we have dramatically expanded our attention to encompass the AR-15 rifle and other carbine platforms, with new products and an aggressive new branding, Mesatac™. If you turn this catalog over, you will see our new Mesatac catalog with its three flagship product lines, the Black Rock™ stocks and Pyramid™ handguards for the AR-15 rifle; and the Faro® stock adapter for the FN SCAR carbine.

This is a thrilling time for Mesa Tactical. We have always been strong advocates for the tactical shotgun, but at the same time the important tactical role of the carbine cannot be denied, plus the Mesa Tactical staff are enthusiastic carbine shooters. In the years ahead we will continue to roll out rugged, stylish and innovative equipment to enhance the AR-15 and other rifle platforms, but we will never forget or forsake where we started: the tactical shotgun.

MESA TACTICAL SWAG 27

NEW TRUCKEE™ FOREND FOR BENELLI M4 SEMI-AUTOMATIC SHOTGUN

- Made from 6061-T6 aluminum and high temperature glass-filled nylon polymer endcaps.
- Industry standard M-LOK slots can accept Picatinny rail sections as well as other M-LOK mounts and accessories.
- Replacement forend counts as one US-made part for compliance with Federal law 18 U.S.C. § 922(r), if necessary.
- Installs in seconds; stays on the barrel when the weapon is stripped for cleaning, but can be easily removed, at the bench or in the field, if access to the gas system is desired.
- No tools required for installation or removal.
- 8½ inch Truckee forend can be installed on any Benelli M4 shotgun.
- 11 inch Truckee forend requires the removal of the Benelli M4 shotgun's factory front sling loop (requires the use of snap ring pliers).

Meeting the urgent requirement for an easy way to mount weapon lights and other accessories on the Benelli M4 semi-automatic shotgun, the new Truckee replacement forend provides industry standard M-LOK® mounting points on sides and bottom.

URBINO® PISTOL GRIP STOCK SYSTEM

#94700
Urbino Tactical Stock for Mossberg 930 (LimbSaver, 12-GA, Black)

- DEVELOPED SPECIALLY FOR LAW ENFORCEMENT AND MILITARY OPERATORS
- REDUCED 12½" IN LENGTH-OF-PULL FOR QUICK HANDLING AND USE WITH BODY ARMOR OR OTHER LOAD BEARING GEAR
- OPTIONAL ADJUSTABLE CHEEK RISER FOR PROPER EYE ALIGNMENT WITH SIGHTS OR OPTICS; NO TOOLS REQUIRED.
- SANTOPRENE RUBBER PISTOL GRIP FOR CONTROL, COMFORT AND FATIGUE REDUCTION
- OPTIONAL LIMBSAVER® BUTT PAD TO REDUCE FELT RECOIL
- MULTIPLE SLING ATTACHMENT OPTIONS, INCLUDING POCKET SLING MOUNTS BETWEEN THE RECEIVER AND THE STOCK

The Urbino is the first truly tactical stock for shotguns. A shorter LoP is necessary for use in tactical applications, especially with body armor. The Urbino Tactical stock is durable, easy to shoulder, will not slip and increases comfort and control.

#90170
SureShell Carrier for Urbino Cheek Riser (6-Shell, 12-GA) (Left Side)

Specially-developed SureShell® shotshell carriers can be fitted to the cheek riser (see page 21). Rail-equipped Urbino stocks can be used without the cheek riser. Risers cannot be fitted to stocks that do not have the rails. All Urbino Tactical stocks are made in the USA, and include Benelli-style rear sling loops for 1¼ inch sling webbing. In addition, a QD style sling swivel is included that fits in a hole in the lower rear of the stock.

** Urbino Tactical stocks for the Benelli M2 can typically be fitted to Benelli M1 and Benelli M3 shotguns as well.

NO LICENSE REQUIRED FOR MOST INTERNATIONAL DESTINATIONS.

URBINO® TACTICAL POCKET SLING ATTACHMENTS

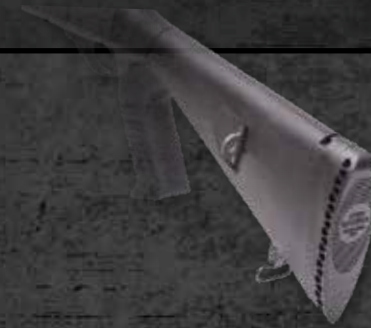

The Urbino Tactical stock system features a molded pocket at the front where the stock meets the shotgun receiver. This pocket is designed to accept any of several stamped steel Sling Loops, Hook Loops or Push Button Sling Swivel mounts (a Hook Loop, Sling Loop and sling plate blank are included with the Urbino Tactical Stock). The Push Button Sling Swivel mount includes a Push Button Sling Swivel, and all sling mounts feature a tough mil-spec manganese phosphate finish. Ambi style sling attachments feature mounts on both sides of the receiver (Ambi and Push Button mounts are not included with the stocks).

REAR HOOK LOOP FOR URBINO TACTICAL STOCKS

The Urbino Tactical stocks include stamped steel sling plates that mimic the factory Benelli rear sling plates. We have produced replacement stampings that feature a circular hook loop instead of the sling loop for use with increasingly popular H&K style (dog leash) sling hooks. These hook loops are stamped steel with a tough mil-spec manganese phosphate finish.

TELESCOPING STOCK AND ADAPTER KITS

LEO® TELESCOPING STOCK KIT

#91250
LEO Telescoping Stock adapter for Rem 870 (12-GA)

- ADAPTS AR-15 STYLE BUTT STOCKS AND PISTOL GRIPS FOR USE WITH REMINGTON 870, MOSSBERG 500/590 AND BERETTA 1301 SHOTGUNS
- ADJUSTABLE LENGTH-OF-PULL TO FIT SHOOTER'S STATURE OR FOR USE WITH BODY ARMOR AND OTHER EQUIPMENT
- OPTIONAL HYDRAULIC RECOIL BUFFER REDUCES FELT RECOIL BY 70%
- GIVES THE SHOTGUNS SIMILAR HANDLING CHARACTERISTICS TO THE AR-15
- PISTOL GRIP CONFIGURATION ALLOWS INCREASED CONTROL AND COMFORT
- SLING ATTACHMENT POINTS INCLUDED
- STOCK KITS INCLUDE ALUMINUM STOCK ADAPTER; 6-POSITION RECEIVER EXTENSION TUBE OR 5-POSITION HYDRAULIC BUFFER; M4 CARBINE BUTTSTOCK; ERGO GRIP; PUSH-BUTTON SLING SWIVEL; AND ALL MOUNTING HARDWARE. SOME HIGH-TUBE KITS INCLUDE OPTICS RAIL.

LEO® TELESCOPING STOCK KIT FOR SHOTGUNS

The stock adapters are investment cast aircraft grade aluminum, machined and powder coated black with a tough, chemical resistant finish. The LEO adapter is our best selling model, and features an optimal stock elevation allowing the use of iron sights or even the bead sight. All LEO adapters accept optional push-button sling swivels, and Remington 870 and Beretta 1301 LEO adapters can accept stamped steel pocket sling loop and hook loops.

BUTT PADS AND RECOIL BUFFERS

LimbSaver slip-on recoil pads feature a patented three-step recoil reduction technology that reduces up to 50% of felt recoil, and maintains target acquisition. They feature a 12 month warranty by LimbSaver. Any Mesa Tactical telescoping stock kit can be upgraded with a Crosshair hydraulic recoil buffer which replaces the receiver extension tube in our stock kits and reduces felt recoil by up to 70%. Purchase either a complete replacement M4 Carbine Stock recoil Additional LimbSaver and standard rubber butt pads for the Urbino Tactical stocks can also be ordered separately.

[50% REDUCED RECOIL]

#91850
LimbSaver® Snap-on Recoil Pad (12 GA)

#92180
M4 Carbine Stock Telescoping Hydraulic Recoil Stock (Mil-spec)

#92190
Crosshair Hydraulic Recoil Buffer

HYDRAULIC RECOIL BUFFER

Takes the place of the receiver extension tube, converting the AR-15 telescoping stock into a recoil-buffered stock assembly without further modification. The recoil buffer reduces up to 70% of felt recoil. Recoil-buffered versions are available for all three of the telescoping stock systems, or the recoil buffer can be purchased separately. The recoil buffer accepts mil-spec dimensioned buttstocks. The Crosshair hydraulic recoil buffer is CNC machined from 6061-T6 aluminum and meets the stringent standards of military and law enforcement users. Our basic kits include the adapter and all necessary installation hardware. No gunsmithing is required for installation.

LUCY® ADAPTER FOR 20 GA SHOTGUNS (REM 870)

20 ga Rem 870 with 12GA Urbino Tactical Stock

20 GA TO 12 GA STOCK CONVERSION

Mesa Tactical's Lucy stock adapter dramatically increases the number and type of butt stocks that can be used with 20 gauge Remington 870 shotguns. Attached at the receiver in place of the standard 20 gauge stock, this cast steel adapter enables the use of any 12 gauge Remington 870 stock. There are many more options for the Lucy adapter, including Mesa Tactical's Urbino Stocks, telescoping stock adapter kits and even the Hydraulic Buffer system.

Stock Adapter for Rem 870

SLING RING™ SHOTGUN SLING MOUNTS

With our new Sling Ring shotgun sling mounts, we've taken an old idea and made it better. The Sling Ring shotgun sling mount fits between the stock and the receiver of a tactical shotgun, providing a sturdy loop for the fitting of single-point or three-point slings featuring H&K style hooks or Magpul Paraclip™ attachment points. Unlike similar sling loops, Mesa Tactical Sling Ring shotgun sling mounts are cast steel, not aluminum nor MIM, and they have no sharp edges to catch on webbing or skin. They are available for left-side or ambidextrous mount. Finally, they are priced attractively so agencies can afford to install them on every shotgun in the armory.

- MACHINED FROM 6061-T6 ALUMINUM
- HARD COAT ANODIZED MATTE BLACK
- MOUNTS VIA BRACKETS ATTACHED TO SHOTGUN OR VIA DRILLED AND TAPPED RECEIVER HOLES
- MIL-SPEC HARD COAT ANODIZED FOR A RUGGED NON-GLARE FINISH
- MOST SURESHELL ALUMINUM SHOTSHELL CARRIERS MOUNT DIRECTLY TO A SPECIFIED RECEIVER

REMINGTON

The Sureshell receiver mounting system for Remington 870, 1100 and 11-87 shotguns uses a combination of steel fasteners threaded into a steel pin (at the rear) and paired Chicago screws (up front) for more secure attachment to the shotgun without the risk of pinching the receiver. The mounting plate even features a window over the shotgun serial number location, to make it easier for armorer's to inventory their weapons.

#90320

SureShell Carrier for Remington 870
(4 shell, 12-GA, left side)

MOSSBERG

The side mount system of our shotgun SureShell aluminum shotshell carriers for the Mossberg 500/590 substitutes two custom-machined steel Chicago screws for the trigger pin. At the front of the mounting plate, custom retaining steel hardware is used with an elongated extractor screw and a machined key hole in the plate.

#90390

SureShell Carrier for Moss 500/590
(6-shell, 12 GA, left side)

MOSSBERG 930 Our side mount shotgun SureShell Aluminum Shotshell Carriers for the Mossberg 930 substitute custom-made steel Chicago screws for the trigger pins. The mounting plate features a window over the shotgun serial number location, to make it easier for armorer's to inventory their weapons.

SureShell Aluminum Shotshell Carriers for the Mossberg 930 fit on the left side of the receiver only and will not interfere with the forend.

#93030

Sureshell® aluminum carrier for Moss 930 (6-shell, 12-ga)

#90110

SureShell® Carrier for FN SLP (4-shell, 12-GA)

FN SLP The mounting system for the SureShell carrier for the FN Self-loading Police shotgun is similar to that of the Mossberg 930, with two sets of Chicago screws in place of the two trigger pins.

SureShell aluminum shotshell carriers for the FN SLP fit on the left side of the receiver only, and will not interfere with the forend.

- MOUNTS VIA BRACKETS ATTACHED TO SHOTGUN OR VIA DRILLED AND TAPPED RECEIVER HOLES
- FOUR AND SIX SHELL CONFIGURATIONS WITH MULTIPLE RAIL LENGTHS

#92130

SureShell Aluminum Carrier and Saddle Rail for Rem 870 w/ Mag Clamp (6-shell, 12-GA, 20 in)

Mesa Tactical SureShell Aluminum Shotgun Carriers with Rail combine a shell carrier with a MIL-STD-1913 (NATO STANAG 4694) Picatinny rail that accepts optical, sights, lasers or accessories. These shotgun carrier/rail systems mount via a "saddle" style method (Remington shotguns) or by using the drilled and tapped holes on top of the shotgun's receiver.

NO LICENSE REQUIRED FOR MOST INTERNATIONAL DESTINATIONS.

SURESHELL® STOCK MOUNT SHOTSHELL CARRIERS

BENELLI STOCK MOUNT

Our Stock Mount SureShell carriers fit on most Benelli pistol grip fixed stocks. The rugged stamped steel SureShell bracket replaces the stock's sling loop and mounts four additional shells securely on the side of the stock (does not fit on Benelli M4 stocks, nor will this shell carrier fit on the Urbino Tactical stock). This assembly is also available with an H&K style (dog leash) hook loop opposite the shell carrier instead of the webbing loop.

#91840
Stock Mount SureShell Carrier for Benelli M1/M2 (4-shell, 12-GA)

SURESHELL ALUMINUM SHOTSHELL CARRIERS FOR THE URBINO TACTICAL STOCK

Urbino Tactical stocks with cheek risers can accept SureShell carriers secured right on to the cheekpieces themselves. As with our other SureShell products, these shell carriers feature all aluminum construction.

#90160
SureShell Carrier for Urbino Cheek Riser (4-shell, 12-GA, Left Side)

M4 CARBINE STOCK MOUNT SURESHELL ALUMINUM SHOTSHELL CARRIERS

SureShell carriers are also available for the M4 CARBINE stock (the kind that we supply with our telescoping stock kits). Offered in four- and six-shell versions, these fit securely to standard M4 CARBINE style stocks from Mesa Tactical as well as other suppliers. Though designed to be installed on the right side of the stock, they can be inverted and installed on the left side if necessary.

#93340
SureShell Carrier for M4 CARBINE Stock (4-shell, 12-GA, Right Side)

STOCK MOUNT SURESHELL SHOTSHELL CARRIERS / 12 GAUGE

* This item includes an H&K style hook loop on the opposite side from the shell carrier instead of the standard 1 inch sling loop.

NO LICENSE REQUIRED FOR MOST INTERNATIONAL DESTINATIONS.

SURESHELL® HOOK & LOOP SHOTSHELL CARRIERS

Strong Hook & Loop for ultimate grip.

While Mesa Tactical's development focus has long been on the needs of the professional tactical operator, we have nonetheless enjoyed some acceptance in the tactical competition community, especially Three Gun. In response to a long expressed desire from Three Gun competitors for a quick-release version of our popular on-gun shell carriers, we've introduced Hook & Loop SureShell carriers.

Hook & Loop SureShell carriers combine our SureShell Polymer carrier yoke with 3M SJ3572 hook fastener material laminated to a 3/32" Formex 94 substrate. This allows Hook & Loop SureShell carriers to be easily attached to and removed from surfaces, such as shotgun receivers and MOLLE vests, covered with mating loop material.

The Hook & Loop SureShell carriers are sold with adhesive backed 3M SJ3571 loop fastener that can be glued directly to a shotgun receiver.

BARREL AND MAGAZINE CLAMPS

#92690
Barrel Clamp with Rail for Mossberg 930 (12-GA)

- PROVIDES MOUNTING POINTS FOR LIGHTS, SLING ATTACHMENTS OR OTHER ACCESSORIES
- CNC MACHINED FROM 6061-T6 ALUMINUM
- CAN BE USED TO MORE SECURELY SUPPORT AFTER MARKET MAGAZINE TUBE EXTENSIONS

The Mesa Tactical Magazine Clamp can be used to more securely retain after market or factory magazine extensions, while at the same time offering flexible accessory mounting options near the shotgun muzzle. Magazine clamps are available with a push-button quick release sling swivel or a two inch MIL-STD-1913 (NATO STANAG 4694) Picatinny rail that can accept standard weapon light mounts.

The Magazine Clamp can also be used to mount one inch diameter weapon lights simply by clamping one side to the shotgun barrel and the other side to the light body (recommended for use with shotguns with tall front sight posts only).

Our Barrel Clamp offers an accessory mount point for shotguns that do not have extended magazines. Its unique clamping mechanism ensures a secure fit even under recoil.

Mesa Tactical Magazine and Barrel Clamps can accept accessories made for Mesa Tactical Stock Adapters, including Mesa Tactical Adapter Mount Rails (see page 26).

#90810

PICATINNY RAILS

- MIL-STD-1913 PICATINNY RAILS
- CNC MACHINED FROM 6061-T6 ALUMINUM
- RECEIVER MOUNT AND SADDLE MOUNT STYLES AVAILABLE
- ALL NECESSARY MOUNTING HARDWARE IS INCLUDED

Mesa Tactical provides two methods for mounting Picatinny rails to tactical shotguns. For Remington shotguns, we offer the Mesa Tactical Saddle Rail, which mounts to both sides of the receiver and wraps around the top. Top mount rails work with Remington, Mossberg and Benelli shotguns that feature factory tapped rail mounting holes in the top of the receiver.

All Mesa Tactical Picatinny rails are machined from 6061-T6 aircraft quality aluminum, and finished with mil-spec Type III hard anodizing. Mesa Tactical Picatinny rails include all necessary mounting hardware.

RECEIVER MOUNT PICATINNY RAILS

Receiver-mount rails are made to be mounted onto the receivers of Remington, Mossberg, and Benelli shotguns with pre-drilled and tapped mounting holes. These rails can be used with custom drilled and tapped weapons.

#90770
Picatinny Rail for Mossberg 500/590 (Standard Profile, 4 1/2 inch)

#94500
Picatinny Rail for Kel-Tec KSG (12-GA, 13 in, 18 in barrel)

The Picatinny optics rail for the Kel-Tec KSG features small aluminum flanges on either side of the main rail that can accept additional lengths of Picatinny rail to support weapon lights or targeting lasers (accessory rail not included, see immediately below). A pair of unique steel recoil blocks featuring angled set screws ensure the rail assembly is securely mounted to the shotgun.

ADAPTER MOUNT RAIL

#93900
Adapter Mount Pic Rail for
Rem 870 (12-GA, 9½ in)

ADAPTER MOUNT RAILS

Adapter mount rails are designed to mount optics for use with High-tube telescoping stock adapters, or to mount accessories slightly away from the receiver when fastened to the telescoping stock adapter side accessory mount points. When used for optics, the elevation of the tall profile rails is similar to that of a flat top AR-15.

MESATAC

PROFESSIONAL GRADE.

After a decade and a half of producing innovative, rugged accessories for the tactical shotgun, we have expanded our attention to the tactical carbine, especially America's most popular centerfire rifle platform, the AR-15. MESATAC™ will launch as a fresh identity to brand a new line of tactical accessories for carbines and rifles, with the same innovation, quality and attention to detail that has made Mesa Tactical's shotgun stocks and shell carriers industry standards among professional operators.

We are kicking off the new MESATAC marque with two lines of rifle and carbine furniture:

(PG 5). **+ THE BLACK ROCK™ LINE OF STOCKS FOR AR-15 RIFLES AND CARBINES**

(PG 7). **+ THE PYRAMID™ LINE OF ALUMINUM AR-15 FLOATING HANDGUARDS**

In addition, the Mesa Tactical Faro® stock adapter for the FN SCAR carbine has been re-branded as a MESATAC accessory. Because MESATAC products are rifle accessories, all MESATAC branded items require a license for export.

CONTENTS:

MESATAC RIFLE PRODUCTS

BLACK ROCK™ Stocks for AR-15 Rifles and Carbines	5 ○
PYRAMID™ Handguard for AR-15 Rifles and Carbines	7 ○

STOCK ADAPTER FOR FN-SCAR **FARO**[®]

FEATURES:

- ADAPTS THE FN SCAR TO ACCEPT ANY AR-15 BUTT STOCK
- EXPANDS FN SCAR OWNERS AFTER MARKET BUTT STOCK OPTIONS
- MIRRORS AR-15 STOCK TO TOP RAIL HEIGHT
- INTEGRAL AMBIDEXTROUS QD SLING ATTACHMENT POINTS
- MACHINED FROM INVESTMENT CAST ALUMINUM
- AVAILABLE IN BLACK AND FDE

The Faro Adapter is easy to install and requires no gunsmithing. Simply remove the factory stock, slide the adapter in its place, and then install any AR-15 buffer tube and stock. The Faro adapter includes ambidextrous QD sling attachment points.

BLACK ROCK™ STOCKS FOR AR-15 RIFLES & CARBINES

#9598K
BLACK ROCK TC TELESCOPING
CARBINE STOCK FOR AR-15 (CONCAVE BUTT, BLACK)

- CONCAVE BUTTPAD HUGS THE SHOULDER; CONVEX BUTTPAD SLIDES IN AND OUT OF THE SHOULDER POCKET EASILY AND IS ½ INCH LONGER THAN THE CONCAVE BUTTPAD.
- LOP OF FIXED STOCKS CAN BE MODIFIED BY COMBINING ANY OF THREE BUTT SPACERS (INCLUDED WITH THE BLACK ROCK FC; AVAILABLE SEPARATELY FOR THE OTHER BLACK ROCK STOCKS).
- BLACK ROCK FC WITH CONCAVE BUTTPAD CAN BE CONFIGURED WITH LOPS OF 11¾ (NO BUTTPAD), 12¾, 12½, 12-7/8, 13, 13-3/8 OR 13-5/8 INCHES (CONVEX BUTTPAD IS ½ INCH LONGER)
- BLACK ROCK FR WITH CONCAVE BUTTPAD SHIPS WITH LOPS OF 13 (NO BUTTPAD) OR 13½ INCHES; AND CAN BE CONFIGURED WITH ADDITIONAL LOPS OF 13¾, 14-1/8, 14¾, 14-5/8 OR 14-7/8 INCHES WITH SEPARATELY PURCHASED BUTTPAD SPACERS KIT (CONVEX BUTTPAD IS ½ INCH LONGER).

The new Mesatac Black Rock series of AR-15 stocks is a complete line of rugged, stylish stocks that feature flexible butt pad and sling attachment options and striking appearance. Instead of simply producing yet another telescoping carbine stock, we designed a comprehensive line of stocks that can be installed as fixed or collapsing stocks on rifles or carbines.

96080	Strike Plate for Mesatac AR-15 stocks			AR-15	-	License	20.00

PYRAMID™ HANDGUARD FOR AR-15

When Mesa Tactical decided to produce a floating handguard for the AR-15, we wanted to design something that was slim and comfortable and easy for agencies to adopt and install. These were the considerations behind our new line of Mesatac Pyramid aluminum handguards. It doesn't hurt that they look great, too.

The Pyramid handguards stay slim and smooth and lightweight by eschewing quad rails and instead employing M-LOK™ slots on sides and bottom. M-LOK slots don't have sharp edges or burrs, and accept Picatinny rail sections where you need them, or specialized light mounts or vertical grips. The barrel nut can be installed without shimming, indexing or timing, so one Pyramid handguard is easy to install while installing multiple handguards in an armory environment is considerably simplified. The longer Pyramid handguards are design to stop just sort of the muzzle device, so muzzle brakes and flash and sound suppressors can be removed and installed without taking off the handguard.

- Handguard is machined from 6061-T6 aluminum, with an ASTM A311 steel barrel nut.
- MIL-STD 1913 Picatinny accessory rail runs the full length of the top surface.
- Industry standard M-LOK slots on sides and bottom can accept Picatinny rail sections as well as other M-LOK mounts and accessories.
- Requires removal of FSB and factory barrel nut, and installation of low-profile gas block (not included). Requires specialized armorers' tools for installation.
- Barrel nut does not need to be shimmed, indexed or timed, so installation is simplified, especially on multiple rifles.
 - 9½ inch Pyramid handguard covers the carbine gas block.
 - 12 inch Pyramid handguard covers the mid-length gas block.
 - 15 inch Pyramid handguard covers a 16 inch barrel up to the muzzle device.
 - 17 inch Pyramid handguard covers an 18 inch barrel up to the muzzle device.
