

BLADE

BUILT-IN TRANSITION

NEW OPTION!

We are now offering a new ramp door option! The **Blade** is a 16" deep steel tread plate transition that is integrated right into the ramp door. The welded-on design is built for the long haul and provides a clean look. It's a great addition for landscapers or anyone else who might want to eliminate the extra step that a fold out ramp flap adds. This option is available on 3,000lb. capacity ramp doors with up to 12" of extra height.

Other restrictions may apply.
