Bubble Free Applicator investment for Signs & Imaging

Family run sign making specialists, Signs & Imaging (southeast) Ltd. produces signage for virtually everything including shops, warehouses, public shopping centres, building sites and mobile events.

Keen to avoid the expense of buying a flatbed printer, Signs and Imaging looked at numerous applicators to help speed up the mounting of cut example, onto various boards.

They were recommended the Bubble Free Applicator by a colleague. The Bubble Free Applicator, distributed in the UK by Josero, allows a sign and laminate a wide range of materials in super fast time whilst eliminating the danger of bubbles or creases.

Dean Johnson, Managing Director of Signs & Imaging (Southeast) Ltd. decided to go and see the Bubble Free in action to see if it really did perform as it claims to. Dean comments: "We were extremely impressed with the performance of the applicator. It was easy to operate, fast and efficient and operated from either side providing greater flexibility with where we could install it."

Signs and Imaging worked closely with the Josero team to ensure The Bubble Free Applicator would meet all their requirements. Once they'd installed the applicator, Josero arranged installation, training and technical support for Dean and the team.

Dean continues: "The new Bubble Free Applicator will enable us to take on and output more work without having to take on more staff. It's a fantastic investment for our business and we'd encourage anyone in our situation to consider the same option. We're convinced it will help us improve our service offering and increase our profitability."

Loic Delor, Managing Director of Josero concludes, "Signs & Imaging is now part of a large team of extremely happy Bubble Free Applicator customers. Our best selling products and sales are rapidly growing for this innovative and extremely reliable table."
