

## Drilling Risers for Jack Up Operations

Claxton holds one of the largest riser stock inventories.

**Claxton holds systems up to 12,200psi and a 4,000 item inventory of supporting equipment. No other company can supply the range of pressure, connection and tooling options that Claxton offers.**

However our stock is not the only thing we supply. Claxton has been supplying risers since 1990 and our deep experience means we're often able to meet the needs of challenging projects at short notice.

### Multiple System Options

Claxton offers an existing inventory of both flanged and mechanical squench (Merlin) connections in multiple pressure configurations. We're not constrained by having to supply a particular system, meaning we can select the optimum riser for your project.

### Full System Supply

From individual riser joints, through to complete riser systems with tensioning equipment, VIV suppression strakes and subsea connectors, Claxton riser systems can meet the needs of your drilling campaign.

### Subsea Connectors and Adaptors

Our riser systems are complemented by our comprehensive inventory of subsea connectors, H4 connectors, crossover

adaptors, DSA flanges, lifting adaptors and bolting/gasket stocks.

**Rapid Mobilisation** - Our inventory is available for rapid mobilisation from stock with 100% contingency as required.

**Multiple Pressure Configurations** - We supply systems for pressures up to 12,000psi, with a variety of joint connection options, from flanges to quick-connect options, though to world-first shrink-fit technology.

## Drilling Risers

### Flexible Commercial Options

We provide risers on sale or rental terms to suit the needs of your project. We also provide experienced crews to run the system offshore.

### Ancillary Equipment

Claxton has long been pioneer in riser tensioning. Our slimline tension ring (pictured) can be installed offline, passed through the rotary table and is fully adjustable to eliminate space out issues.

Additionally, our hydraulic riser handling tool recently saved a client £1.8m in rig time whilst improving operational safety.

Visit [www.claxtonengineering.com](http://www.claxtonengineering.com) for more information about our drilling riser technology.
