Specialist processing of pre-painted & metallic coated steels

KLOECKNER METALS UK | OCS

OCS is one of the largest pre-coated Steel stockists and distributors in the UK & ROI.

Since the company's formation in 1990 we have worked closely with our customers to analyse their material requirements and, where appropriate have developed alternative product solutions. Our experienced and knowledgeable team are available to assist with your future development requirements. We source from a

number of world-class suppliers to offer an unparalleled range of pre-painted Steel products. OCS is also a specialist in coated-Steels with increased corrosion resistance. Product development is an ever-increasing part of the service we provide to our customers. OCS has access to full mill-technical support, and in most instances bespoke non-standard products can be developed and manufactured to fulfil the desired application / specification. OCS's

central location means that we are able to distribute materials throughout the UK and Ireland quickly and efficiently.

With full ISO 9001:2008 and ISO 14001:2004 accreditation and a focus to constantly provide excellent service, OCS maintains high levels of quality and continues to exceed customer expectations.

We bring new and improved products to our customers drawing on a quality product range and supported by world class suppliers.

Kloeckner Metals UK

Kloeckner Metals UK are the largest mill independent multi metal stockholder & distributor in the UK, the largest producer independent distributor of steel and metal products and one of the leading steel service centre companies in the European and American markets combined.

The nation-wide coverage afforded by our many sites, each offering a broad array of products and processing facilities, allows us to deliver a personal and local service backed by global purchasing strength. This provides an unrivalled ability to meet the individual requirements of our customer.

Our total commitment to customer service continues to allow Kloeckner Metals UK opportunities to support our customers' needs; be it product range, development of new products or processing requirements. A fast and efficient service is assured.

Products

Why choose Pre-paint?

Pre-painted Steel offers a cost-benefit compared to post-painting (taking into account transport costs + coating costs + admin cost etc).

Operational benefits:

- Reduces manufacturing cycle time (Pre-paint steel reduces the number of steps involved from goods inwards to the end finished product).
- Scheduling of production is more flexible as no waiting for coating applications. Wet or Powder coated.
- Wide variety of finishes and effects available, often ex stock from OCS.
- Back to back product consistency.
- Range of material warranties available to aid in customer confidence.

Environmental benefits:

- Dramatic reduction of hazardous waste disposal in the manufacturing process compared to post-painting.
- Eliminates the need to store hazardous chemicals and paints.

Plastisol

Benefits

Very good corrosion resistance
 Very good formability
 Excellent abrasion resistance
 Internal and external application
 Wide range of colours and gauges

Applications

Construction, cladding, roofing
 Heating and ventilation
 Partitions
 Garage doors

Leathergrain embossed, 200-micron PVC paint system.

Product Range

Kloeckner Metals UK | OCS

Specialists in pre-painted steel

We strive to meet and exceed our customers' expectations every time they come into contact with us.

Granite HDX

Polyester

Estetic Tex
Granite Tex

Granite HDX

Benefits

- Excellent corrosion resistance
- Excellent UV stability
- Excellent formability
- RoHS compliant

Applications

- Sandwich panels for roof cladding
- Architectural buildings
- Excellent for both internal & external architectural designs

Light grained appearance, 50-60 Microns system.

Polyester

Benefits

- Textured Polyester
- Smooth Polyester
- Dry Wipe-Board Polyester
- Lighting Polyester (Gloss Levels 20-80%)
- Agricultural Polyester
- RoHS compliant

Various polyester paint systems available.
Paint thickness: 12-80 microns.

Applications

- Vending Machines
- Domestic Boilers
- Spray Booths
- Air Handling Equipment
- Lining Panels
- Boiler Casings
- Whiteboards / Magnetic Boards
- Lighting
- Agricultural Buildings

Estetic Tex/Granite Tex

Benefits

- Good formability
- Very good surface hardness
- RoHS compliant
- Wide range of colours and gauges

Applications

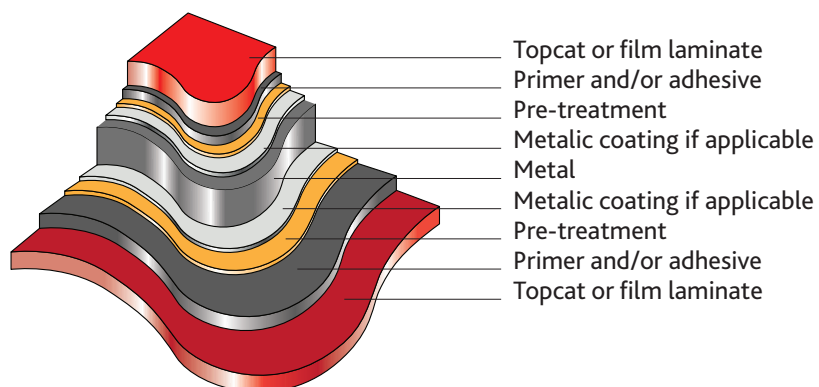

- Domestic boilers
- Office furniture
- Vending machines
- internal and external applications
- Heating and ventilation units

Textured Polyester, 35 Micron paint system.

Products

Typical composition of a coated product.

Typical composition of a coated product.

Foodsafe Laminate

Benefits

Suitable for contact with food
Resistant to staining, mould growth
Good formability
RoHS compliant

Applications

Cold stores
Food preparation areas
Clean rooms, hospitals & mortuaries

Lightly textured, 120-Micron white laminate.

Kloeckner Metals UK | OCS

Specialists in pre-painted steel

"Our aim is to bring new & improved products to our customers drawing on a quality product range & supported by world class suppliers."

OCS specialist products compliment the already diverse range of materials that KM UK has to offer.

Woodgrain Laminate

Woodgrain Laminate

Benefits

Good formability
Good UV stability
Suitable for external applications

Applications

Garage doors
Lifts
Outdoor sheds

Lightly textured, 130-140 Micron PVC laminate, giving the appearance of wood.

Aluzinc

Aluzinc

Benefits

Excellent corrosion resistance
Available with 'clear anti-finger print sealant'
RoHS compliant
Up to 20 year-performance warranty

Alloy composed of Aluminium (55%), Zinc (43.4%) and Silicon (1.6%). 150g and 185g coatings available.

Applications

Petrochemical industry
Insulation
Switchgear & Electrical enclosures
HEVAC units
Industrial Doors

Magnelis

Magnelis

Benefits

Excellent corrosion resistance
RoHS compliant
Up to 10 times more corrosion resistant than Galvanised Steel

Applications

External Gutters
Door Manufacture
Agricultural Applications
Steel Sheds
Silo's
Ducting / Spiral Tubing

Alloy composed of Zinc + Aluminium (3.5%) and Magnesium (3%). 90g up to 310g coatings available.
