ACCESS PLATFORM

The Multitel MX270 has in line outrigger jacking as well as the option to extend the H-Frame outriggers, on single or both sides, for additional outreach. The 27m platform is mounted on a 7.5t Mitsubishi Canter.

With 90 degree each way cage rotation the Multitel MX270 is ideal for working on a wide range of tasks where space is limited and the platform needs to work over an obstacle.

SPECIFICATION

- Max Working Height: 27.3 m
- Max Lateral Outreach: 13.3 m
