PRECISE CONTROL

PNP90 AND PNP90 XT² RIVETING TOOLS ARE THE PERFECT SOLUTIONS FOR COMPLETING ALL OEM HOMOLOGATED BLIND RIVET AND SPR RIVETING OPERATIONS IN A SINGLE SYSTEM.

STANDARD COMPONENTS

They are specifically developed for the most difficult materials such as Ultra High Strength Steels and modern dissimilar laminate materials in the automotive, truck and bus repair industry. The premier PNP90 XT² is an adjustable 10 ton pneumatic-hydraulic system for riveting and pressing out self-piercing rivets.

The standard PNP90 has a pushing (compression) force of 6 tons. Blind rivet capability is also available to run from the same system.

The equipment's universal OEM rivet technology enables adaption of various attachments for different OEM homologated applications.

This universal riveting system can save thousands of dollars versus having to purchase numerous riveting systems as specified individually by various OEMs. Easy to use, lightweight and highly efficient - these riveting tools allow your technicians to complete repairs in record time, saving you both time and money.
