SHADING EFFICIENCY

Transmittance is the amount of light and heat transmitted beyond the fabric. The lower the amount, the greater the efficiency.

Block/reflect is the amount of heat and light that is blocked or reflected. The higher the amount, the greater the efficiency.

Absorption is the amount of heat and light absorbed in the fabric. The higher the amount, the lower the efficiency.

Ultraviolet protection illustrates how protective the fabric is in protecting against ultraviolet rays. The higher the amount, the greater the effectiveness.

AQUILA

The Northgate Aquila fabric is designed for areas where privacy and shading of light is required along with exceptional performance characteristics. The weaving process of this Flame Retardant composition ensures this fabric has a distinguished natural look making it suitable for almost all applications. With a calculated selection of 16 colours to cover the full palette, along with the most advanced range of fabric widths available, fabric joins are kept to a minimum to assist in wastage, design and speed of fabrication. This fabric incorporates Biosafe® which is the international accreditation standard of our proven antimicrobial formula that has been tested under the most stringent measures to ensure effective inhibiting of infection.
