

CloudEQMS

Enterprise Quality Management Software

QHSE Risk & Compliance and more...

CloudEQMS - Enterprise Quality Management Software (EQMS) powered by Integrum (Australia) is a proven, globally deployed integrated management system. This software is hosted in ISO27001 approved data centres and has excess of 200,000 users across more than 40 countries.

CloudEQMS powered by Integrum is currently the most comprehensive All-In-One Document Management, QHSE Risk and Compliance Business Optimisation Solution.

Specifically engineered to exceed the requirements of many Quality Standards and regulations including: ISO 9001:2015, ISO 27001 Information Security, ISO 14001 Environmental Management, OSHAS 18001 Health & Safety and Care Quality Commission (CQC).

CloudEQMS is offered as single application – switch on / off functionality to meet your organisations needs with unlimited users as part of a single license. No clunky expensive bolt-on modules!

CloudEQMS is fully web enabled, with access via web browser

CloudEQMS is a solution that is rich in functionality and yet highly configurable. Out of the box, you have all the functions required for real time incident and action management and reporting, investigation management, risk & compliance management, controlled document management, audit management (and scheduling), contractor management, training and performance management and includes a world-class (rich & sophisticated) business intelligence capability for reporting, collaboration, analysis and dashboard development.

CloudEQMS is fully customisable to match your organisation look and feel, colour schemes, logos etc.

CloudEQMS Functionality Overview

NEW! SMARTForms

Powerful, easy to use SMARTForm builder to create any type of form for incident, inspection, checklist, risk assessment, questionnaires, surveys, audits, etc. Simple 'Drag and Drop' function to create fields, sections, layouts, with configurable workflows for any type of business workflow process.

Business Intelligence System

Create (either from our default library) or from your requirements any type of reports including event generated, request generated scheduled report, dashboard, and scorecards.

Incident / Accident Management

Full incident and accident management capability. Automated workflow and escalations. All assigned actions logged and tracked with overdue status reports. Automatic email notifications with options to link to documents.

Risk Management & Hazard Identification

Fully conforming to ISO 31000 and COSO standards. User definable risk matrices and risk assessments can be linked to controls and corrective action processes, centralised libraries of associated procedure, regulatory requirements, cross referenced to action plans or projects

What makes CloudEQMS unique?

CloudEQMS is offered as one application, not in modules so all the functionality is provided as part of the enterprise-wide license. We also provide unlimited users licensing, inclusive of **CloudEQMS** Business Intelligence software, so there is no need to purchase additional users licenses or concurrent seats. As your business grows or as the solution is deployed more widely i.e. contactors etc....

CloudEQMS architecture allows it to be easily integrated in real time or batch mode with other systems including SAP, PeopleSoft, Oracle, Mincom, ERP systems, Trim, MS SharePoint, Lotus Notes, SQL databases, and more.

CloudEQMS interconnect with various email systems including. MS Exchange, Outlook via Active Directory for email notifications and escalations.

Rich Business Intelligence functionality is deeply embedded and seamlessly integrated within **CloudEQMS**, providing a full range of rich reporting templates to create and generate real time reports, graphs, tables and dashboards from any data set.

CloudEQMS BI tool allows full export capability to products such as Adobe PDF, Microsoft Excel and Microsoft Word

CloudEQMS is fully web enabled and delivered as Software as a Service (SaaS) End user access the system via web browser. iOS and Android App(s) for incident capture, SMARTForms, and Business Intelligence.

Industries covered include: Law Firms, Health Care, Manufacturing, Engineering, Insurance, Energy, Oil and Gas, Utilities, Construction, Aerospace & Defence, Local Government, Education, and Transport.
