

## FOR MODEL 22NT, 24NTX, 44NT, 66NT, 88NT

▶ *Upgrading the aluminum injection manifold to a machined steel injection manifold*

- *Improved machine performance due to new valves which come with the manifold*
- *Is a good preventive maintenance action to take after ten years of machine service.*
- *Manifold is made out of STEEL and protected by a Black Oxide treatment*
- *Longer life time in production.*
- *Tougher resistance to wear and erosion.*
- *Stops oil leaks and prevents air penetration in the hydraulic system.*
