

# Drain Dye

Drain Dye adds a strong colour to water to trace the underground flow of a drainage system. Find leaks, drain damage, contamination and water pathways, as required.

Whether a sewerage pipe or grey water system, the Drain Dye is a quick and simple system, giving the information you need to proceed with a project.

## Benefits

- Strong colour, for clear results
- Available in 6 colours - trace more than one water course at the same time or just for preference
- Cost-effective - use just a tea-spoon with 10 litres of water to trace the flow
- Non-toxic and odourless
- Available in 3 different sizes - keep larger tubs at the depot to top up each van
- Simple to use - just add to water and pour into watercourse

## Available in 6 colours:

## Available in 3 sizes:

200g jar, 1Kg tub or 5Kg bucket
