

Slade Green Medical Centre tightens up clinical governance by using Lantum

“It’s really easy to download all the GP’s relevant documents and I like the added reassurance that they’ve already been checked by a GP.”

TINA, CRANWICH ROAD

Challenge

Tina used to spend hours every week chasing, checking and filing GP locum documents. She also spent an hour at the beginning of every locum session inducting new GPs and wanted something to eliminate all of this hassle.

Solution

She tried Lantum and was able to review and download the successful applicant’s documents in just a few clicks. She uploaded her locum pack to her profile and GPs received it via email before the session started. This has enabled her to concentrate more on QOF and prepare for a CQC inspection.

TIME SAVED

If Tina had found GPs herself she said this would have taken at least 32 hours/month.

“Lantum has proven to be very reliable for us. Patients like the GPs they provide and it made our CQC inspection much easier than in the past. I’ll never use an agency again.”
