Welcome to Allsigns International Ltd

Following our extensive experience in delivering a wide range of signage schemes Allsigns have developed a unique signage range for educational establishments of all types.

Whether working with the customer directly or liaising with architects or designers, we aim to provide our clients with a professional, quality service that fulfils all of their signage needs.

To this end we have developed a signage range that offers you the flexibility you need to implement a comprehensive wayfinding strategy, whilst maintaining a sleek, modern design aesthetic that will compliment any style of building.

Our success over the last 20 years has stemmed from our understanding of our clients requirements, our ability to take a design brief all the way from concept through to installation and our continued investment in new equipment and key personnel. In-house design, manufacture, project management and installation ensure you have the peace of mind that your project will be delivered efficiently on time and in full.

The Government Procurement Service is an executive agency of the Cabinet Office. Their overall priority is to provide procurement savings for the UK public sector as a whole and specifically to deliver centralised procurement for central government departments.

The centralisation, standardisation and aggregation of spend on common goods and services are a key mechanism to deliver significant, sustainable cost reductions to the public sector.

The GPS have calculated that to prepare a competitive tender costs an average of £25,000 and takes 72 working days. The GPS framework removes the need for EC directives, tenders and negotiations. Due to the GPS's rigorous tendering and evaluation process that we go through ensures that our products and services meet their exacting criteria. Allsigns have held this accreditation with the GPS since 2005. We have consistently demonstrated that we offer exceptional levels of service, quality and value for money.

+ Design

From a complete re-signing of an existing building to specifying a signage system for a brand new building project, our studio team are on hand to aide every facet of design. Our expertise in all aspects of design, materials and signage systems make Allsigns the ideal partner to manage and deliver your sign project.

We understand that now more than ever it is vitally important to develop a visual style that not only compliments your buildings but also reflects the values of your organisation.

By working in conjunction with your designers, marketing department and FM team we can develop and design a signage system that exactly fits with your environment, your corporate branding and mirrors your established core values.

Our in-house design team are all highly experienced in producing high quality visuals and artworks for presentation and display purposes, as well as finished artwork and technical data for sign off prior to production commencing.

With continued investment in new equipment and the latest design software we offer an unparalleled design service.

▶ **Manufacture**

With manufacturing sites in North Nottinghamshire, South Yorkshire, Devon and Berkshire Allsigns have a huge production capacity which encompasses a wide variety of materials and production methods.

From large format digital print to specialist fibre-glass moulding Allsigns have the capability to produce a wide cross section of signage types. It is this that sets us apart from so many other companies, who profess to manufacture, but in reality factor in most of their products.

Based in Exeter, signssystemstms produce a unique collection of signing products which are suitable for any signage or wayfinding requirement. This diverse collection includes internal and external signage, point of sale products and poster and display cases.

This family of interchangeable signage has a modern, contemporary design feel whilst offering a highly flexible system that can be changed or amended as you require it.

▶ Manufacture

Based in South Yorkshire, Pryorsign have over 40 year's experience of signage production. Specialising in fibre-glass signage, Pryorsign produce the unique Duralite. This signage medium is used widely in the museum and heritage and interpretational sectors due to its weathering qualities and its vandal resistance. Demonstrated to last for up to 15 years externally with no visible loss of vibrancy or clarity Duralite is also extremely hard wearing. This sign medium has been used widely in the educational sector in both difficult and challenging environments.

Not only do we have specific areas of specialisation, but the Allsigns group of companies also offer a comprehensive range of standard and statutory signage. With over 18,000 product lines held in stock for a next day delivery, we can look after every aspect of your signage: From your bespoke wayfinding project to traffic management, to your health and safety signage, we can manage every aspect of it.

Project Management

Installation

From the moment your signage project becomes live our team of managers will begin to schedule the various phases of your scheme. Whether planning a site survey or arranging plant hire, our project team will liaise with your site personnel or contractors to ensure a smooth progression.

All risk assessments and method statements are supplied to you prior to installation commencing to ensure all relevant site hazards have been identified and allowed for.

We will supply any plant or scaffolding that is required to ensure the installation goes according to plan. If necessary we can work outside of normal hours to complete the signage installation and in some cases we have had fitting teams work through the night in areas not accessible during office hours.

Once installation is complete our fitters do not leave the job until a customer satisfaction sheet has been signed off.

With a new sign project it is often the case that whilst concentrating on the more complex elements of the signage it is very easy to overlook the statutory requirement.

Allsigns can incorporate a comprehensive safety sign survey in and around your building to ensure it complies with all current safety sign legislation.

As part of our commitment to our industry Allsigns are members of the Health and Safety Sign Association. This guarantees that all of the statutory signage we supply fully conforms to ISO7010 which has sought to harmonise graphical symbols throughout member states of the European Union.

+ Traffic Management

From the marking of accessible parking bays to site speed limit information; pedestrian and vehicle management around site is an important element of your signage policy.

Allsigns offer a wide range of “off the shelf” solutions, as well as the option of bespoke signage designed specifically for your operational needs.
