

TRIMMING MACHINE **B M W**

for vineyards

**NEW SERIES "E600"
WITHOUT SLIDINGS**

Type "E600A"

- 4 hydraulic movements:
 - raise
 - inclination
 - inclination correction
 - top inclination

The new **BMW** E600 trimming machine has been studied to eliminate all the slidings and to reduce all the obstructions. The result is a an easier and lighter machine.

The trimming machines come in various models to suit all kinds of requirements and type of systems.

All the models satisfy any kind of exigence and type of installation; they are all applied in front of tractor.

The power required is supplied by hydraulic sockets of the tractor or upon request a separate hydraulic control unit can be provided.

Hardened steel blades ensure top quality trimming with high cutting speeds (2000-2500) even when the tractor move s fast along.

The special drive belt used does not require a belt tensioner.

patented
