

Mitel MiVoice 6900 Series

Mitel's new 'mobile first' IP phones - designed for today's mobile work force

MOBILE INTEGRATION

MobileLink mobile device integration allows users to seamlessly transfer calls between desk and mobile phone mid call.

Mobile calls can be answered on the desktop phone and contacts are automatically synchronised, allowing access to the same information on both devices.

Stay connected and never miss that all important call

HIGH RESOLUTION DISPLAY

The stylish Mitel 6900 series desk phones come equipped with high resolution colour screens to maximise productivity.

The unique smart phone integration moves a step beyond the usual VoIP mobile phone app to keep everyone connected in and out of the office.

NO MORE WIRES

The 6900 Series IP phones feature WiFi connectivity, allowing users to un-tether their desk phone, and use Bluetooth Sync for smart phone connectivity.

The built in USB socket allows users to charge their mobile devices directly from their desk phones.
