

# ESSENTIAL BATHING

## The range of Compact Tub Baths

This unique bath range is designed mainly for deep soaking and for fitting into very small spaces. They are either single or double seated and can all be fitted with hydrotherapy spa systems and lights

Single seat tubs are 92cm long and range from 58cm to 81cm deep.

Twin seaters are 137cm long by 81cm deep or 132cm long by 74cm deep.

They are robustly made and supplied on their own self supporting frames.

**The Koromo** bath is ideal for where space is at a premium. With or without a spa system, this deep tub offers full immersion in the smallest of bathrooms.

**12 jet air spa available with optional chromotherapy light on all our deep baths**

**The Kigoi** tub being slightly shallower, offers a great compromise between soaking and showering within the most compact of spaces. See specification page for bath sizes

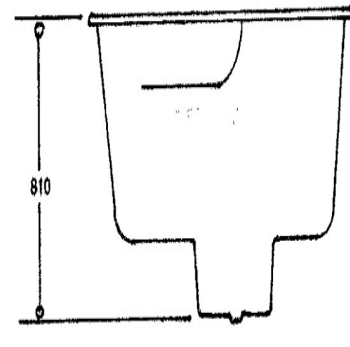

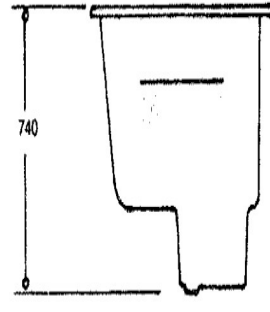

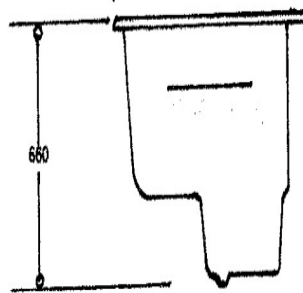

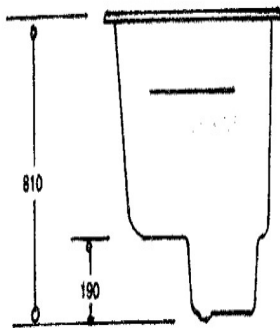

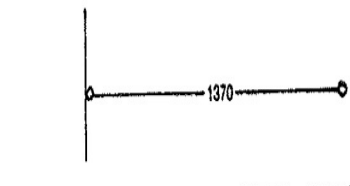

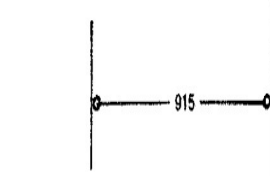

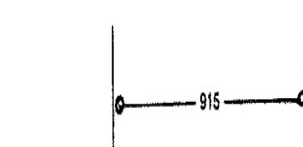

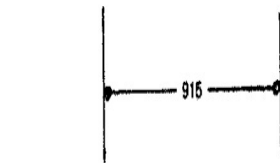

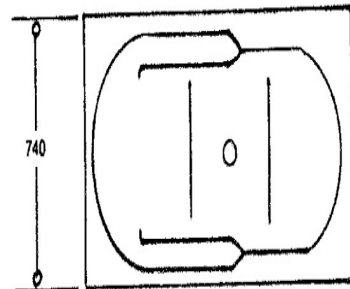

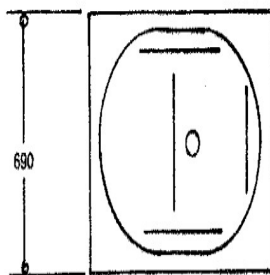

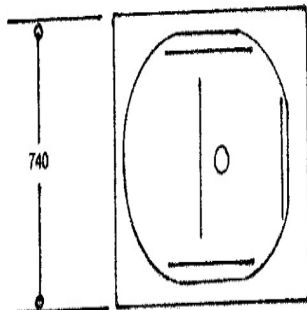

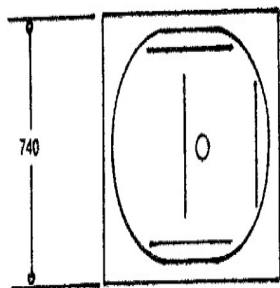

**The Chagoi** (above) at 1370mm x 740mm offers deep soaking for either one or two people in less space than most conventional baths

**The Tancho** bath (below) at 1200mm x 760mm completes the range of compact baths, and like all our baths, is sturdy enough to use as a shower as well
