Quality healthcare essentials

GBUK Group

GBUK Group was established in 2008 and is today a successful, dynamic and innovative company specialising in the manufacture and distribution of quality healthcare products.

Our products provide clinical performance and value. Our rigorous research and development programme has already resulted in the introduction of many innovative products & product design improvements.

We are committed to developing and improving the environmental sustainability of our products, a principle which we have also carried forward into the creation of our new Headquarters building. We generate 92% of our power requirements on site by means of our own wind turbine, and take steps to optimise water, fuel and energy efficiency, to minimise waste and to increase recycling rates.

GBUK Group award-winning specialist companies are expert in the provision of enteral feeding, critical care and patient moving and handling products and technologies. GBUK Group companies are suppliers to every UK NHS Trust and to a rapidly expanding Export customer base.

Since GBUK was formed in July 2008 the organisation has continually delivered innovative products based on 'needs' identified from Clinicians' feedback regarding the health, safety and the well-being of their patients. We believe this is what makes the UK health industry the best in the world; UK Clinicians are prepared to get involved and give their precious time to help companies like ours design, innovate and manufacture leading-edge products. However, we are not working on expensive medical solutions, we are working at delivering innovation and change to routinely used 'day-in day-out' medical products. We believe that our heuristic approach is unique within the healthcare industry and has resulted in the usage of GBUK products rising from 10,000 per day in 2008 to more than 213,000 today.

We have an active research and development team permanently engaged in discovering and developing new innovative products, as well as improving our existing ones. This enables us to continually deliver effective solutions and ensure that GBUK remains at the forefront of healthcare innovation.

GBUK Group companies provide class-leading products for a wide range of clinical applications in both hospital-based and community healthcare.

GBUK Enteral is the leading specialist enteral feeding device company. Our innovative products enable healthcare professionals to provide enteral feeding support to their patients. Every day thousands of patients in hospital and their own homes benefit from our products.

Enteral Product Range

Pages: **04-23**

GBUK Healthcare provides consumables for surgical and post-operative care. Each day more than 150,000 GBUK Healthcare products are used to care for patients - our products are used in every hospital in the UK. Products include blood pressure cuffs, surgical suction systems, wound drainage and women's health. We are progressively introducing ISO 80369-6 NRFit products to our range. See page 22 for more details.

GBUK Banana provides manual handling products developed in close partnership with leading clinicians to provide the safest technologies available to assist with the moving and positioning of patients. Whilst putting our patients' safety and dignity at the forefront of our developments, we also look to minimise the risk of injury to healthcare workers & provide them with the support they need to offer the highest standards of care. Our products include slide sheets, transfer boards, turning devices, air devices and many more innovative accessories to assist daily living.

Enteral_{UK} is dedicated to the provision of innovative devices that enable healthcare professionals to provide enteral feeding support to their patients.

Enteral_{UK} is working with the world's leading enteral feeding device suppliers to implement the new ENFit ISO 80369-3 international standard. We are collaborating with clinicians and representatives from all clinical interest groups and regulatory agencies to ensure that the transition to the new connectors is easy and safe for the patient.

Enteral Connector Brush

For keeping ENFit® connectors & taps free of debris.

Product Features

- ✓ ENFit connectors have larger and deeper grooves, meaning increased area for debris to collect and potentially cause connection issues
- ✓ Using a brush after every use helps to prevent the accumulation of debris, and the feeding tube cap from adhering to the connector
- ✓ Keeping the connector and cap free of debris can help to extend the lifespan of the tube

In line with GEDSA ENFit cleaning Procedures 2018 recommendations Ref <http://stayconnected.org/wp-content/uploads/2018/05/ENFit-Cleaning-Procedures-All-Tubes.pdf>

Gastrostomy

ENPLUG™ Stoma Plugs

ENPLUG are designed for emergency use to keep stomas from closing when a gastrostomy device has fallen out.

The ENPLUG packs are available in 2 different lengths and various French sizes in case the stoma has already started to close and the currently used device no longer fits the stoma.

Pack Sizes

- ✓ **ENPLUG-S** Silicone Stoma Plug 4cm 10, 12, 14, 16Fr
- ✓ **ENPLUG-L** Silicone Stoma Plug 7cm 10, 12, 14, 16Fr
- ✓ **ENPLUG-XL** Silicone Stoma Plug 7cm 18 & 20Fr

Product Features

- ✓ Stops stoma sites from closing
- ✓ Saves the stoma until a new gastrostomy tube can be placed
- ✓ Includes a range of French gauge sizes in each pack to provide options even when stoma has started to close
- ✓ Effective, safe and inexpensive
- ✓ Saves staff time in emergency situations
- ✓ Promptly dealing with gastrostomy emergencies prevents use of other incorrect or inappropriate feeding devices
- ✓ Made from high grade medical silicone for flexibility
- ✓ Tapered tip for ease of insertion

Filter Needle

Used to draw up and filter Medication into an ENFit Syringe via a glass ampoule.

Product Features

- ✓ Assembled with a protective sheath
- ✓ 5µm filter for filling from glass ampoules
- ✓ 18 gauge stainless steel needle with an angled tip allows for easy penetration through a vial's rubber membrane
- ✓ 38mm & 50mm long for easy use with most vials
- ✓ Commonly used with oral/enteral medications such as caffeine
- ✓ Features an ENFit connection, allowing ENFit syringe users to draw up oral/enteral medications from manufacturers' vials, ampoules, and other containers
- ✓ Ergonomic ridges on connector to allow easy connection/disconnection

Bio-Cuff Single Patient BP Cuffs
and Neo-Cuff Neonatal BP Cuffs

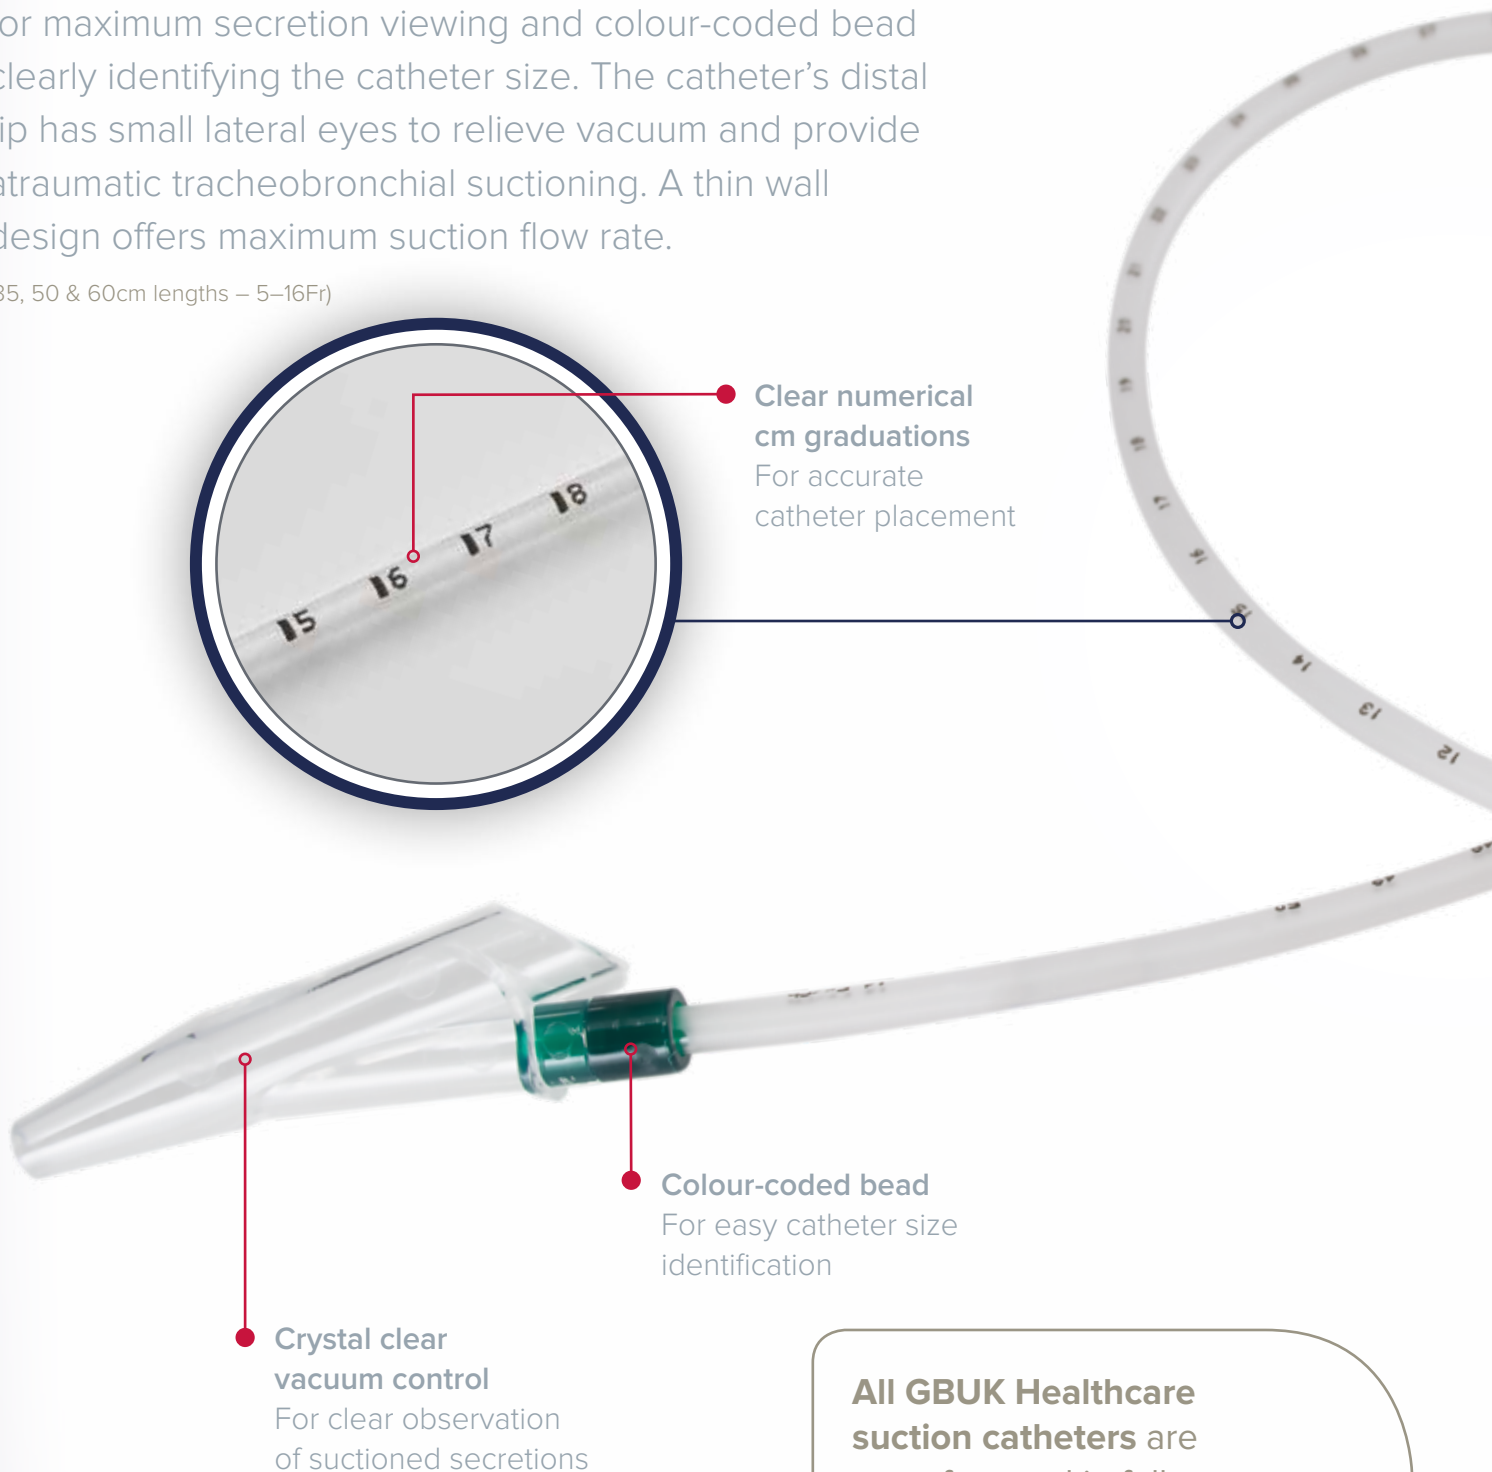

Open Suction

TenderTip

Highest quality catheters with crystal clear vacuum control for maximum secretion viewing and colour-coded bead clearly identifying the catheter size. The catheter's distal tip has small lateral eyes to relieve vacuum and provide atraumatic tracheobronchial suctioning. A thin wall design offers maximum suction flow rate.

(35, 50 & 60cm lengths – 5–16Fr)

Clear numerical cm graduations
For accurate catheter placement

Colour-coded bead
For easy catheter size identification

Crystal clear vacuum control
For clear observation of suctioned secretions

All GBUK Healthcare suction catheters are manufactured in full compliance with BS EN ISO 8836:2009

Frosted, soft, medical grade PVC
For comfort & ease of introduction

TenderTip

TenderTip catheters are the best-selling and most widely used open suction catheters in the UK. The vacuum control is the most recognised design in all areas of use.

Optimal tip design
For maximum suction performance

Atraumatic tip design with side relief eyes
For increased patient safety

Closed Suction

TenderTip 24h

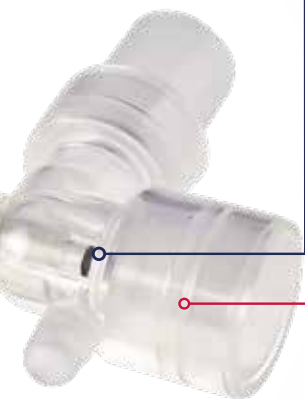

TenderTip 24h closed suction catheters are designed to be used for up to 24hrs. Available in both tracheal (34cm) and endotracheal (54cm) lengths. Atraumatic internal catheter has clear cm graduations. Supplied with a flexible catheter mount, day-change stickers and a patient's notes sticker.

(34cm tracheal & 54cm endotracheal – 10, 12 & 14Fr)

“...suctioning with closed catheters.”*

* Hess D. “Care of the Ventilator Circuit and its Relation to Ventilator-Associated Pneumonia”. Respiratory Care. 2003; 48: 869-879.

Double-swivel elbow
Reducing strain on ventilator tubing, for patient comfort

TenderTip Neonatal

Neonatal closed suction in 5, 6 & 8Fr catheter sizes. Kit includes 3 Y-Adaptors. The 31cm, soft internal catheter has high-visibility coloured depth markings for accurate and safe suctioning.

TenderTip Paediatric

Soft catheter options in 6, 7 & 8Fr with coloured depth markings. Kit includes 3 Adaptors for use with popular paediatric ET tubes.

TenderTip T-Piece

An adult 24hr closed suction catheter with a single swivel elbow incorporating a removable cap to allow easy and controlled "weaning" from mechanical ventilation. 12 & 14Fr options.

"...early extubation."**

Closed Suction

TenderTip 72h

TenderTip 72 hour closed suction catheter features an advanced peep seal for up to 72 hours use. The unique design of the colour-coded ergonomic vacuum control not only allows one-handed operation, but also provides instant remote indication of the catheter's lock status.

(34cm tracheal & 54cm endotracheal – 12 & 14Fr)

Included in Kit:

Catheter Mount

Flexible 15mm ventilator connector

Day Change Sticker

Clear indication of change day for staff

Soft, quiet, EVA sheath

For ultimate tactile feedback & catheter manipulation

Advanced proximal seal

Maintaining PEEP integrity

Irrigation port, with one-way valve
Allowing simple catheter tip cleaning

Clear observation port

Aiding secretion monitoring

Intuitive, one-handed operation With clear on/off indication

Colour-coded vacuum control

For catheter size identification

“...suctioning with closed catheters.”*

* Hess D. “Care of the Ventilator Circuit and its Relation to Ventilator-Associated Pneumonia”. Respiratory Care. 2003; 48: 869-879.

ADVANCED
FEATURES TO
**REDUCE
VAP**

Cyclonic cleaning chamber
Applying vacuum automatically draws saline lavage into the distal cleaning chamber where strong cyclonic action efficiently washes both the catheter tip and peep seal.

Advanced PEEP seal
Providing 360 degree catheter cleaning.

TenderTip Plus

An adult 72hr suction catheter with an integrated PEEP valve to isolate the cyclonic cleaning chamber & maintains patient PEEP.

Double-swivel elbow
Reducing strain on ventilator tubing for patient comfort

Supplied Separately:

Saline Dose 15ml

Sterile. For catheter cleaning via irrigation port.

Product code: R0159

Cyclonic cleaning chamber
Efficiently washes catheter tip

“...early & accurate diagnosis.”**

High Vacuum Wound Drainage

High Vacuum Systems

Safe-T-Vac is a high vacuum post-operative wound drainage system consisting of a rigid pre-evacuated bottle, connection tubing and Redon PVC drain with an attached trocar.

Product Features

- ✓ Initial vacuum of 95kPa (950mbar/712 mmHg)
- ✓ Crystal clear bottle – graduated for reliable observation of drained content
- ✓ Radiopaque Redon PVC drain with attached trocar (8-16Fr options)
- ✓ Drain length 78cm, perforated length 14cm
- ✓ 200ml, 400ml & 600ml bottle options, each with bed hangers
- ✓ Integral vacuum status indicator with clear min/max
- ✓ DEHP & Latex free

NRFit Syringes

GBUK Healthcare and the new ISO 80369-6 NRFit Neuraxial connector.

To address the risk of wrong route administration ISO 80369-6 medical device connectors are being progressively introduced worldwide, replacing conventional Luer connectors. Sampling and delivery devices intended for neuraxial applications and for major regional anaesthesia will in future utilise ISO 80369-6 connectors.

Neuraxial connectors are to be branded NRFit, and where practicable these devices will for easy identification be coloured yellow.

GBUK Healthcare is working with global regulatory authorities and industry partners to ensure the universal availability of NRFit connectors.

Slip Syringe

ISO 80369-6:2016

is the international standard that specifies requirements for small-bore connectors intended to be used for connections in neuraxial applications.

Neuraxial Applications

involve the use of medical devices intended to administer medications to neuraxial sites, wound infiltration anaesthesia delivery, and other regional anaesthesia procedures or to monitor or remove cerebrospinal fluid for therapeutic or diagnostic purposes.

NRFit

is the dedicated connector for neuraxial and regional block devices and is not compatible with luer connectors.

Blood Pressure Cuffs

Neo-Cuff: Single Patient Use

A complete range of five single patient use neonatal cuffs in single and dual hose options. Colour-coded for easy identification, all Neo-Cuff designs feature super-soft material with gently rounded corners. Every Neo-Cuff has clear artery and range markers, with advisory indicators to show when a smaller or larger Neo-Cuff would be the more appropriate choice.

Each Neo-Cuff is brightly decorated with nursery characters to ease parental anxiety at the sight of clinical equipment.

Range markings also include advisory indicators to use a smaller or larger cuff.

Clear and comprehensive markings show the cuff size, artery position and cuff range.

Soft materials and rounded corners for comfort - protecting delicate and vulnerable young skin.

Precise luer push connectors.

Neo-Cuff is colour-coded according to cuff size.

Size 1

Neonatal, 3-6 cm

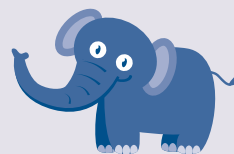

Size 2

Neonatal, 4-8 cm

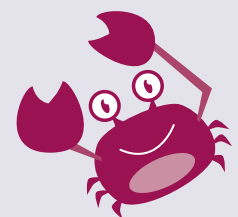

Size 3

Neonatal, 6-11 cm

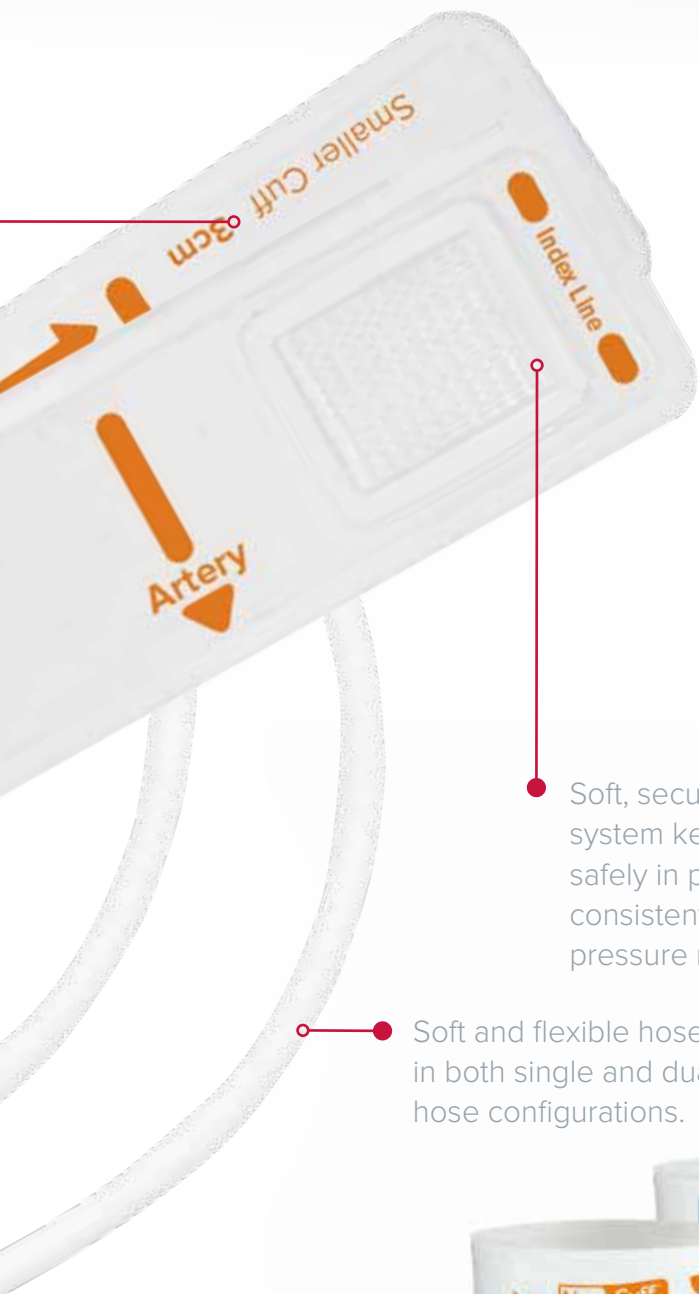

Size 4

Neonatal, 7-13 cm

Size 5

Neonatal, 8-15 cm

Soft, secure hook-and-loop closure system keeps the Neo-Cuff safely in place. Essential for consistent and accurate blood pressure measurement.

Soft and flexible hoses in both single and dual hose configurations.

Latex Free

GBUK Banana is one of Europe's leaders in the technology of patient moving and handling.

The Banana range includes lateral transfer boards and sheets used for moving patients from a bed to a trolley or operating table, slide sheets to assist in repositioning patients in bed, and hoists and slings for moving patients in safety and with dignity. Innovative and providing excellent value, GBUK Banana products directly enhance & improve the safety and well-being of patients and carers.

Patient Repositioning, Prone & Transfer Devices

Single Patient Use Slide Sheet, Washable Slide Sheet, Disposable Slide Sheet, Versal, Intoprone, Orbit, Transfer Sheet, Lateral Folding, Lateral Rigid, Rolaslide, Prime Seated, Q2 Seated and Original Seated

Patient Elevation

**Loop Sling, Clip Sling
and Lo-Raiser**

Air Assisted Devices

**Air Reusable,
Single Patient Air Assisted
and FloJac**

Patient Repositioning

Single Patient Use (SPU) Slide Sheet

Strong and durable red hemmed slide sheets with high slip performance. Silicone coated on both sides with a low profile seam, this sheet provides long lasting, high slip characteristics to enable safe and easy patient repositioning and transfers.

- Product Features**
- ✓ Strong sheet – optimum durability
 - ✓ Individually packed – reduces unnecessary use
 - ✓ Silicone coated with high slip finish
 - ✓ Safe & easy patient movement

Patient Repositioning

SPU Slide Sheet

Uniquely designed, two toned colour tubular slide sheet enables full range of movement and has the ability to use the tube for skin loading or use of X-ray cassettes. The two tone colour identifies which sheet to hold when repositioning patients.

Product Features

- ✓ Two toned colour simplifies training & practice
- ✓ Openings for ease & flexibility in movement
- ✓ Silicone coated with high slip finish
- ✓ Safe and easy patient movement

Product Code	Product Description	Unit of Sale
EGT100230	Slide, Two toned slide sheet 100cm x 230cm in a drawstring bag, Single Patient Use, 100cm x 230cm	

SPU Slide Sheet

Patient Care Packs make life simpler. These packs provide a solution for improving patient care and dignity. Packs can be hung on the bed to ensure the slide sheets are always within easy reach for the carer which saves nurse time locating sheets. The sheets are individually sealed to reduce the risk of cross infection and can help ensure slide sheets are readily available to assist in the patient's needs.

Product Features

- ✓ Pack solution for improving patient care
- ✓ Sealed sheets in a bag to help prevent cross contamination
- ✓ Storage bag to hang by the bed to ensure the correct number of sheets are in reach
- ✓ Helps save nurse time

Disposable Slide Sheet

Perforated roll format for convenient low cost use. A strong triple layer waterproof sheet which is designed to maintain its integrity when wet and dry. With excellent slip characteristics and delivered in a convenient perforated roll format, this sheet is the ideal choice where an easy to use, low cost option is required.

Available in a choice of sizes

Product Features

- ✓ Advanced materials and design technology
- ✓ Latex Free
- ✓ Available in tubular and flat
- ✓ Perforated roll format

Patient Repositioning

Transfer Sheet

Unique handle design for controlled patient transfer. Manufactured from a specially designed polypropylene non-woven fabric. This transfer sheet has a material strength of 500kg when wet and dry.

- Product Features**
- ✓ High material strength (500kg SWL) when wet or dry – suitable for all patients
 - ✓ Six ergonomically positioned handles – even distribution of patient’s weight during transfer
 - ✓ High lateral slip characteristics – stress free patient transfer
 - ✓ Individually packed – reduces risk of cross contamination

Direct Codes	Product Descriptions	Unit of Sale
NWF085190H	Transfer, Handled Transfer Sheet, Single Patient Use, 85cm x 190cm	10 units/box
NWF110190H	Transfer, Handled Transfer Sheet, Single Patient Use, 110cm x 190cm	10 units/box

Versal System

The Versal System, designed by Diane Hindson of County Durham & Darlington NHS Foundation Trust & developed by GBUK Banana, is a moving & handling slide sheet with a difference.

Versal replaces the need for multiple flat or tubular slide sheets. The patented design facilitates a full range of patient movement with the versatility of both flat and tubular sheets. Versal is a single sized sheet, placed under the patient in the same position, for every procedure.

Product Features

- ✓ Simplifies and helps reduce confusion of slide sheet selection by having one sheet for all repositions medially and laterally
- ✓ Improve patient safety by ensuring all bony prominences of the patient are protected by two layers of slide sheet
- ✓ Can improve patient comfort, reduce nursing time and improve efficiency of care
- ✓ Can help reduce the hidden costs of pressure ulcers or an MSK injury

Banana Versal

Helps reduce the risk of injury

Helps avoid hazardous manual handling operations

Helps make proper use of equipment provided for safety

Helps ensure that activities do not put others at risk

Patient Proning

Intoprone & Orbit

Unique easy to use proning devices used to accurately turn patients into a prone position. Staff maintain complete control during the entire turn and no longer have to “catch” the patient. Risk of staff injury is significantly reduced and patient safety is improved.

Eliminates need to “catch” the patient and reduces risk of staff injury

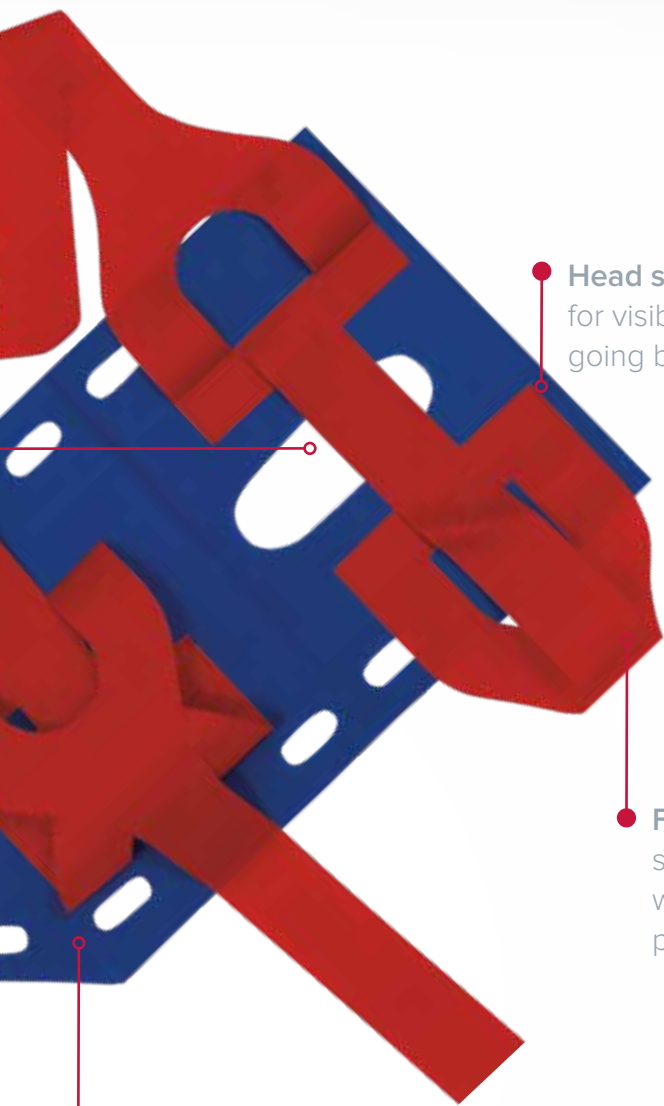

Banana Orbit

Section removed to ensure no pooling under the patient and prevents compression on the chest

One piece device easy to insert and remove

Complete control of patient during proning improves patient safety

Watch the instructional video at www.gbukbanana.com

● **Head section removed**
for visibility of the airway
going back to supine

● **Flexible**
suitable for use
with a range of
proning supports

● **Individually packed**
reduces risk of cross
contamination or wastage

○ **Banana Intoprone**

Banana Proning Devices

- ✔ Complete control of patient during proning – improves patient safety
- ✔ Eliminates need to “catch” the patient – reduces risk of staff injury
- ✔ One full piece device – easy to insert and remove
- ✔ Time saving for clinicians

Direct Codes	Product Descriptions	Unit of Sale

B-Orbit	Proning, Orbit - Into & Out of Prone, Single Patient Use, Patient Repositioning, 90cm x 190cm	1 unit

Patient Repositioning

Rigid & Lateral Folding

Unique folding mechanism for semi upright patient transfer.

High strength polypropylene for maximum durability

Smooth, low friction surface for safe patient transfer

Choice of widths and lengths to meet user needs

Product Features

- ✓ Folding mechanism supports semi upright or supine patient transfer
- ✓ High strength polypropylene for maximum durability
- ✓ Lightweight with six handles for easy manoeuvrability
- ✓ Anti slip pads ensure maximum grip during transfer

Lightweight with ergonomically positioned handles

This board can be easily positioned and removed in all transfer situations and requires minimal storage space. Two lengths and two widths of board are available, the narrower 59cm board is ideal for use in confined areas, whereas the wider board will effectively bridge a gap of up to 18cm.

Rolaslide

Rolaslide is a lightweight foldable patient rolling slide board. This system enables patients to be transferred safely and comfortably with minimal effort or risk of injury to carers.

Lightweight rolling slide board for safe, comfortable transfers by a single carer

Product Features

- ✓ Reduces risk of injury during lateral transfer
- ✓ Rollable Sleeve
- ✓ Lightweight for safe, comfortable transfers
- ✓ Foldable Design

Rollable sleeve protects board from contamination

Foldable minimises storage space required

Direct Codes	Product Descriptions	Unit of Sale
EZ-100 (QRS01)	Board, Standard Roll Board, Reusable, Patient Repositioning, 55cm x 177cm	1 unit
QRS01-DSL10	Board, Roll Board Covers, Single Patient Use, Patient Repositioning, 60cm x 180cm	1 unit

Flexible Roll

The Flexible Roll Board is lightweight & comes in a material bag, meaning the board can be easily rolled and stored away. The flexible nature ensures there are no solid ridges to the board making transfer more comfortable and adaptable to different surfaces.

Heat sealed edges to reduce infection control

Product Features

- ✓ Rolls for easy storage
- ✓ Thin and lightweight
- ✓ SWL 150kg

High slip surface reducing forces in movement

Rollable sleeve protects the board

Patient Elevation

Lock Sling

Pro-Lock® disposable sling has been developed to provide a cost effective patient handling solution to the increasing challenges of infection control. Available in four sizes (x-small, small, medium and large), the Pro-Lock® is designed to be issued for single patient use only and to be disposed of when soiled or no longer required.

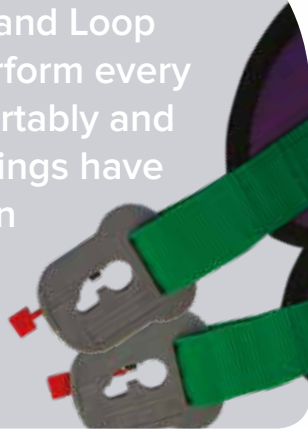

The Pro-Lock® sling incorporates a head support for increased comfort and a Patented Positive Locking Clip fixing, suitable for use with any hoist with a clip fixing mechanism.

Positive Locking Clip Fixing - Patent Applied For: GB0821240.9

230kg
weight limit

GBUK has a wide range of slings for Clip and Loop hoists to help perform every procedure comfortably and safely. The clip slings have a patented design to ensure safety when lifting a patient.

Product Features

- ✓ Infection control maximised
- ✓ Laundry costs eliminated
- ✓ Unique safety harness configuration
- ✓ 230kg weight limit
