

CLEANING AND CARE INFORMATION

To maintain the appearance of your products clean by using a soft damp cloth and dry with a soft dry cloth or chamois leather. For stubborn stains, use undiluted washing up liquid.

Do not use abrasive or acidic cleaning products, scouring agents, products containing alcohol, scouring pads or steel wool. Lime scale can be avoided by wiping away drops of water immediately after use.

Easy Clean Glass Finish is an application that makes the glass water repellent by bonding an invisible non-stick polymer coating to the glass, creating an impenetrable barrier against lime-scale and other kind of build-up.

Shower screens are supplied with this finish to help you make light work of keeping it looking just like new. Care must be taken when cleaning glass protected with Easy Clean Glass Finish.

All abrasive cleaning products must be avoided as they will destroy the polymer coating which in turn will reduce the effectiveness of the application.
