

RMF Responsive Operating System

Our process is designed to get the sheet metal fabrications and assemblies you want, when you want them, and how you want them. It all starts with quick-turn prototypes to prove out your concept.

Once we're ready to move forward with production our Customer Development and Operations Teams go to work. You'll leverage their skills at managing complex product supply chains and highly aesthetic requirements in order to meet your production and quality demands.

1

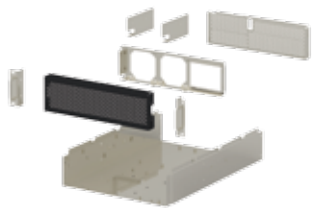

CUSTOMER DEVELOPMENT TEAM

A collaborative team that focuses on matching our strengths to your most important goals. From Concept-Design-Delivery, we're with you all the way.

- Responsive
- Account Management
- Problem Solvers
- Inside Sales
- Divergent Thinkers
- Engineering
- Careful Listeners
- Quality

New Product Implementation:

- Dedicated Team
- Prototypes From 3D Models
- Meeting Your Deadlines

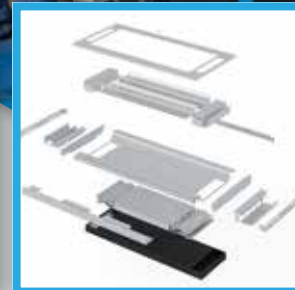

2

OPERATIONS TEAM

If you're looking for an equipment list here it is: laser, punch, bend, weld, paint, assemble – exactly what you get at a sheet metal fabricator, only cleaner. Now let's get to what really makes a difference.

- Self-Directed Team Members
 - Cross-Trained
 - Growth-Oriented
- Unrestricted Continuous Improvements
- Integrated Quality System – The Teams are the Quality System
- Supply Chain Management
- Learning Organization

RMF'S COMPANY VISION IS TO HAVE THE WILLINGNESS TO TRY, THE COURAGE TO FAIL AND THE PERSISTENCE TO MAKE IT WORK.
