The Visoglide plus aluminium patio door provides expansive glass areas with clean aesthetic lines. The versatile system is designed for both commercial use, where large opening apertures are required, and in homes to offer a thermally efficient glass façade that maximises light and offers exceptional views. Sightlines can be reduced further with the slim interlock option whilst the large glass sliding sashes have easy and smooth operation due to robust sliding mechanisms.

Offering contemporary styling and robust performance that has been rigorously tested, the Visoglide plus has been designed to deliver large panes of glass with optimum weather and thermal performance. Smart's polyamide thermal break technology results in the Visoglide plus being able to achieve a U Value of $1.6 \text{ W/m}^2\text{K}$ when installed with a suitable sealed unit.

Visoglide Plus aluminium patio doors are available in slide or lift and slide operation, on double or triple tracks. The Visoglide Plus doors are available in both single and dual colour in wide choice of standard and non-standard finishes including Smart's unique Sensations range of textured colours. The system is also suitable for use with auto slide opening mechanisms.
