

Quality Policy

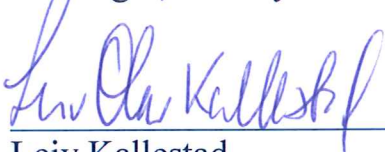

The goal of Optimarin is to provide systems and services for treatment and purification of ballast water of the highest quality, and in accordance with relevant laws, regulations, standards and other requirements. Our objective is to ensure that the equipment is safe and reliable during operation, and that our supporting personnel are professional, knowledgeable, informed, obliging and polite.

A comprehensive introduction and overview of the quality management system will be given to all employees, to ensure that they all fully understand the management system with its associated internal and external obligations. Every employee is expected to be dedicated and to comply with the expectation to deliver high service levels in line with Optimarin's quality control standards.

Optimarin aims to combine products of the highest quality, with the highest safety standards which shall never be compromised. Optimarin will always provide professional service, support and advice, using highly qualified and reliable people to ensure the timely delivery and smooth and safe installation of our system to our clients.

Continuous improvement in all aspects of our operations will be a priority in order to maintain our leading position in the market as a supplier of the highest quality products of ballast water treatment systems.
