

**A SALT STORAGE FACILITY BUILT TO LAST A LIFETIME
...FOR 20% LESS THAN THE COMPETITION**

INDUSTRIAL FABRIC SHELTERS

DESIGN • FABRICATE • INSTALL

TORO
SHELTERS

SPECIFICALLY DESIGNED FOR YOUR OPERATION

Cost effective

- A 20% saving over our nearest competition and up to 40% less than a timber structure
- Prevents a fifth of your salt from being lost/wasted each year through weather exposure
- Toro Shelter's efficient steel structures save considerable cost in site preparation

Quality

- Built to last a lifetime
- Galvanised frame and stainless steel fixings resist attack from salt
- Ultra tough laminated membrane requires zero maintenance
- Designed to withstand the extremes of the UK's severe weather

Flexible

- Toro will work with you to understand your requirement and optimise the solution
- Storage solutions for anything from 250 to 45,000 tonnes of salt
- Installation in days not months to minimise the impact on your operations
- Short lead times to ease your time constraints
- Shelters can be re-purposed, re-located or re-sold

Compliant

- Complies with Environment Agencies' legislation for covered salt storage (PPG10)
- Offers a safe working environment for your employees
- Compliant with Eurocode building regulations
- Our installers will maintain the highest standards of Health and Safety best practice
- Individually designed and configured to a size and colour to help meet your planning permission requirements
