why use our courier
booking platform

two major benefits

1. more efficient

Every international shipment has varying service requirements that affect the costs associated with the delivery.

Using one service provider means that either the service or the price will be compromised. Having access to a multitude of service providers will allow you to choose the **correct service at the right price.**

two major benefits

2. less expensive

Nexus Smart gives you various options on every booking, based on service criteria and costs.

Rather than fitting into one supplier's rigid schedules and processes, you will now have the power to choose the ideal service provider to suit your shipment – at the lowest price. **No setup fees or license charges.**

what are the key benefits?

improved **efficiency**

Match global shipments with the ideal service based on price & efficiency
