DTC-1

The **EASIEST**, most **effortless**, **affordable** and feature packed test chart you will ever use.

If you are looking for a comprehensive visual test system, the **DTC-1** test chart with it's 22" HD screen and 8" tablet controller is your best choice.

A powerful all in one system with an HD quality monitor and computer built into one sleek unit. No wires or cables. You control the system remotely and wirelessly with the tablet provided, with a thumbnail of the test chart on your tablet so you do not need to turn or look at the screen.

From the quick start up to the easy 1 button calibration and the amazingly fast and easy user interface, the DTC-1 test chart has been designed by opticians to give you the most effortless digital test chart experience.

Designed to be used by anyone and everyone, regardless of computer ability. No more fiddling around with setting up the correct distance, no more spending hours trying to understand the complex software, with the DTC-1 you will be up and running in literally one minute.

Navigate between different charts at the flick of a finger, the large 8" HD tablet computer on your desk allows you to select, change and view your charts, images and tests with no effort.

Fed up of having to find the right buttons on your remote controller in a dark room? Easy, our backlit controller shows you all the buttons you need even in the darkest room without illuminating your room
When designing this test chart, we didn't just focus on making it easy to use, we also wanted to make sure you have all the charts you need to carry out a full and comprehensive visual exam. Our chart is packed full of charts for adults to young children.

Save TIME. Save MONEY and look good at the same time
