

**H20** 

Water evokes a deep sense of responsibility among the governments, people and businesses in the Middle East & North Africa (MENA) region, which is the most water-scarce region of the world. Since 2006, H20 has been catering to this growing sensibility with insightful content that promotes the stewardship of this scarce resource. H20 is committed to serving the region's water sector with relevant news, interviews, technical articles, case studies and innovative solutions for the water/wastewater applications in municipal, industrial and built-environment. In H20, you will find leading regional and international players in the water/wastewater industry coming together to discuss and share their thoughts on water management in the MENA region and closing the loop between production and re-use.

#### **MEGAWHAT**

Not only is the power industry in the Middle East today preoccupied with electricity generation, transmission and distribution issues, it is also coming to grips with other emerging topics in energy and power-related sectors like automation, alternative energy, intelligent grids, electric vehicles, to name a few. Formally launched in 2007, MEGAWHAT has since evolved to cover not only its Middle East & North America (MENA) home base, but also its neighbouring regions and beyond. Living up to its catchphrase – ...Who, Where, When & How of the ME Power Industry – it has served its readers well with up-to-date information and timely stories on the industry.

### Now bringing you the best of both worlds, in print, every month...

To serve the overlapping interests of our readers and advertisers, we have combined bi-monthly editions of H20 and MEGAWHAT into a monthly new-look magazine with cutting-edge design and sections. The emphasis continues to be fresh and incisive news and feature stories on current and timely issues involving the water and power industries and related sectors.

#### **PROFILE**

#### **ADVERTISING MATERIAL SPECIFICATIONS**

#### **PRINT ADVERTISEMENT:**

- All artwork should be supplied in either Adobe Illustrator, InDesign, Acrobat (PDF) or Photoshop formats.
- All images need to be at least 300 pixels/inch resolution, CMYK. All fonts need to be supplied or, if in Illustrator, converted to outline. Colour proofs or print-outs must be supplied along with the digital file.
- Other/special sizes and loose inserts are available by request.
- Advertisements can be designed. Cost to be advised

## GLOBALREACH

#### INNOVATIVE DIGITAL SOLUTION

The print editions of our magazines reach a worldwide audience through Zinio, a unique proprietary digital delivery service that CPI pioneered in the region. The technology enables readers to access CPI magazines on-line and/or in a digital format anytime and anyplace, thus adding to the marketing reach of advertisements and increasing the user-friendliness of the titles.

#### **KEY BENEFITS INCLUDE:**

- Instant delivery to readers before the magazine is even printed – particularly valuable to readers based in countries where postal systems are unreliable and/or slow
- Advertisements can become fully interactive direct hot links to your Web site or embedded video files, for example.
- Instant reader-response facility is provided on clicking on the e-mail address embedded in the advertisement.
- Instant auditing of readership as downloads and page clicks are monitored via management reports.
- Faster access to information a powerful search engine allows the reader to locate any articles mentioning your company or products instantly.

- All banners to be provided as JPEG or GIF (in case of animation) along with the links or pointing URL.
- Please ensure maximum file-size for all these banners (except small button - 20k) are not more than - 40k
- If flash banner, then maximum animation time to be
  15 secs and embedded link should be set with target
  "\_BLANK" attribute i.e. the link opens in a new browser window.

# EVENTS

#### THE ANNUAL H20 WATER AWARDS

The Annual H20 Water Awards celebrates the outstanding achievements of the Middle East & North Africa (MENA) water industry. These awards recognise projects and programmes, big and small that have made significant contributions to the advancement of the region's water industry. The projects and programmes are expected to demonstrate a high standard of excellence and quality as well as processes and innovations that promote sustainability.

The third edition in 2012 will feature the 'Product Category' segment, which was introduced for the first time in the 2011 edition. The objective, again, is to recognise innovative and sustainable products and solutions that have contributed to the water industry's progress.

The selection of the winners from amongst the nominations received will be made by expert panel of jurors. Award winners are recognised at the H20 Water Awards Ceremony & Gala Dinner held in the month of November every year.

www.h2ome.net/awards

#### 2ND MIDDLE EAST WATER LEAKAGE SUMMIT

The second Middle East Water Leakage Summit will once again bring together key representatives from across the region's water industry to explore regulatory trends, current issues and practical solutions for leakage reduction.

http://www.h2ome.net/leakagesummit/

#### **MEMBRANE BIOREACTORS (MBR) SEMINAR**

Membrane Bio-reactors (MBR) are becoming popular in the Middle East due to the growing focus on wastewater re-use. MBRs provide filtration at the micron level and deliver high-quality effluent in considerably less space than a conventional plant, making them best-suited for wastewater recycling and reuse applications. This seminar will focus on product and process innovations, research & development, design and optimisation and operational experiences, in the context of the Middle East region.

#### **PROPOSED EVENTS**
