

Trunking

Light Gauge

PSJ
FABRICATIONS
A WOOD GROUP MUSTANG COMPANY

The Complete Cable Management Solution

PSJ Fabrications' trunking has been designed with quick and easy installation in mind, leading to cost and time savings. It brings together over 50 years of experience in the manufacture and supply of high quality metal products. Used in most industrial applications, light gauge trunking is designed to protect and manage cables that would otherwise be suspended on walls or above equipment. Our light gauge trunking has been supplied to many key clients within the automotive and food and beverage industry sectors.

Key services offered

- Design and Development
- Sheet Metal Fabrication
- Non-ferrous and Ferrous Coded Welding
- Prototyping and Batch Work
- Project Management
- Finishing

PSJ
FABRICATIONS
A WOOD GROUP MUSTANG COMPANY

PSJ Fabrications Ltd are a leading specialist in sheet metal design, fabrication and finishing, producing precision engineered components and equipment for a diverse range of industries.

Established in the 1960s and using state-of-the-art equipment and the latest finishing technology, our skilled workforce is able to supply high quality products in a wide range of materials, thicknesses and specifications.

PSJ Fabrications offers a bespoke service, designing parts adapted specifically to client needs and providing high quality customised solutions.

Product Information

PSJ Fabrications' light gauge trunking is constructed from 0.9mm thick galvanised steel, providing resistance to rust. It has been developed using the company's vast expertise and knowledge of sheet metal installations across some of the largest factories within the UK.

Indented tabs on all joints allow them to slot into straight lengths, eliminating the need for extra joining parts. This provides a clean and flush join and achieves a reduction in installation time.

PSJ Fabrications also supply a range of jigs to allow the installer to drill joining holes quickly and precisely. The lids are securely fastened with 180° quick release turnbuckles.

Partitions are available and can be supplied pre-fitted or loose to the lengths. Serrated nuts and bolts are supplied to make sure the trunking is securely connected, and to ensure earthing continuity.

The standard light gauge is available in heights of 50mm and 75mm and widths ranging from 50mm to 400mm. PSJ Fabrications can also custom make light gauge to any size required.

In addition, different types of gauge trunking throughout the range can be assembled and incorporated into the same solution to create a bespoke product.

Features

- 0.9mm Galvanised steel construction
- Lids, fixings, brackets included
- Serrated Nuts and Bolts for secure fixings
- 180° quick release turnbuckles
- Joints locate and slot into lengths
- All parts included
