

'TexRAD is very easy to use and provides a standardized, reproducible approach for image analysis. The support team and software developers have been extremely helpful and responsive and also helped us with grant proposals.'

Dr Amir Borhani

Assistant Professor; Chief of Body CT, University of Pittsburgh School of Medicine, USA

TexRAD user since: 2017

Texture analysis: Abdominal e.g. hepatic fibrosis, hepatocellular adenoma etc.

Modalities: CT and MRI

Additional insights:

The support team and the software developers have been extremely helpful and responsive with all the issues and also helped us with grant proposals.
