

## Environmental Policy Statement

Orbit Distribution understands its responsibilities towards the environment and is committed to reduce its impact on the world in which we live in.

We are committed to the prevention of pollution and to ensuring that our processes are conducted in accordance with the relevant environmental legislation.

In addition to our legal responsibilities, we seek to minimise our impact upon the environment by:

1. Evaluating operations and ensuring they are as efficient as possible: Orbit operates from an environmentally friendly building including Solar Voltac roof panels, Rainwater harvesting, air tightness and more.
2. Reducing energy consumption
3. Minimising waste and promoting recycling: 98% of inbound packaging is re-used as outbound packaging
4. We are members of the BIS for management, reporting and recycling of all batteries imported into the UK

These objectives have been communicated to all employees of Orbit as well as those working on its behalf.
