

# Case Study

## Royal Oldham Hospital

Complete Demolition have completed works on the £32.8m development project at Royal Oldham Hospital, Greater Manchester. The contract is being carried out by IHP (Joint Venture between Vinci Construction and Sir Robert McAlpine) and is the largest capital investment initiative undertaken by the Pennine Acute Hospitals NHS Trust.

Complete Demolition have carried out works on Wards F2, F3, F4, F5, F6, The Lucy Pugh Building and the Accident & Emergency Department. Works on the various phases have included asbestos removal, strip-out works and internal demolition.

Due to the hospital remaining fully operational through the works, the experienced site team have worked around live resuscitation departments, intensive care units and theatres. Complete have worked closely with the client to ensure strict working practices are adhered to which include noise restrictions and dust control and also the minimum of disruption to the hospital and the patients.
