

Retro-fit Automation

The industry's best at a competitive price

The Connect a.d. Retro-fit Automation is ideal for commercial and residential applications as a cost-effective solution for automating existing hinging timber, steel, aluminium and glass doors.

It comprises a surface mounted operator supplied as a single or double leaf, configured to swing inwards or outwards and activated by sensors, push buttons or controlled entry.

Quality & Safety as standard

Our Low Energy operator is ideal for low to medium volume pedestrian access in commercial office buildings and residential buildings such as care homes.

Our Fully Automatic operator is ideal for the most demanding medium to high volume pedestrian access in shopping centres, public buildings, hospitals and hotels.

For reliability and minimal call-backs, we only use the latest operators from Dorma & Record and activation & safety devices from BEA.

Hugh range of options

The Retro-fit Door Automation is designed to meet BS EN 16005 'Power Operated Pedestrian Doorsets safety in use' and BS 7036-0 Risk Assessment.

All components, such as automation equipment and activation & safety devices are designed for ease of installation, maintenance and repair.

Numerous activation options, handles and manual & electric locks increase aesthetics and provide customisation.

Technical Sales & Support

Every enquiry is handled by our dedicated technical sales team who are focussed on providing the best and most cost effective solutions quickly and efficiently.

For every order we appoint a job manager who arranges all material, engineer and Health & Safety resources and scheduling required to carry out the work on time and on budget. Our in house team handle all calls and emails to ensure the smooth running of every job from first contact to completion.

A site meeting with the appointed job manager is held to review the work, confirm site details, to determine site restrictions and hazards, and plan dates for the work.

Our family of long serving and motivated site engineers provide a reliable service delivery of confidence and attention to detail.

Our in-house fabrication facility is also capable of handling all Commercial Entrance Doorset & Shopfront repairs and upgrades from any manufacturer.
