TOUGH **BESPOKE BAGS & PRODUCTS**, GUARANTEED TO DO THE JOB!

When you need tough products for extraordinary purposes, Proflight Bags guarantee exceptional design, quality construction and outstanding durability. We thrive on making the bag that enables our emergency services to do their job. When every second counts, functional user friendly design lets you deploy faster.

At Proflight we design and manufacture our bags in the UK, so when we say that you can have a custom product we really mean it. Every item can be tailored to suit you. Projects range from the fit out of a single appliance right through to provision of bags for all personnel in your organisation.

BA Stowage

### The Proflight Stowage system

The Proflight Stowage system is a scalable system to protect, deliver and enable the use of your operating equipment at the point of need. We design bags that take up the minimum possible space on your vehicle, innovative design provides protection from the external environment, internal restraints and partitions organise and control the contents. The weight, method of carrying, and materials requirements all create part of our design process.

Easy Access  
Kit Storage

### Antimicrobial Fabric

Virtually all products can be specified with Antimicrobial Fabric. Specified by Paramedics, Fire & Safety Services, Ambulance & Accident Services, NHS Health & Safety.

The benefits are numerous:

- Actively prevents bacterial the growth on its surface. Lab tested results against major bacterial and fungal groups
- The treatment used in our fabric is non-toxic and is approved and certified by Oekotex
- Because the antimicrobial active agent is incorporated into the PVC coating itself the antimicrobial performance will remain effective for the useful life of the bag
