

MULTEC
LOG SPLITTERS

LS1...

Designed with a low to ground table for larger logs that are too heavy to be lifted.

LS2...

Designed with a waist height table to save back ache.

Spec of these 2 Splitters...

- Hydraulic.
- Available with either 14 ton or 27 ton force.
- Designed to be interchangeable.
- Ram, wedge and valve can be removed and changed or upgraded.
- Replacement parts readily available but never needed.
- Designed to split even the most seasoned logs.
- The table is 20" squared and heavily braced.
- Full years guarantee free with every splitter.
- Available with Ce safety spec. for two handed operation.
- Standard spec. on both models is 16" stroke. [20" available at extra cost]

Splitters Optional Extras...

- Bolt on four way wedge available as an extra for either model.
- Attachable side table available with the Ls2 model only.
