FITESA JOINS THE UN GLOBAL COMPACT

NORRKÖPING, SWEDEN (April 5, 2019)– Fitesa joins the ranks of another 9,500+ companies that have a strong commitment to voluntarily contribute to a more sustainable future and ethical business environment. The UN Global Compact is built upon a principles-based approach to doing business which focuses on human rights, labour fairness, a sustainable environment and commitment to anti-corruption. The 10 Principles of the UN Global Compact represent the framework for Fitesa’s business strategy. Due to our clear values and management practices and corporate policies, these 10 Principles were always within our DNA. By signing the compact it allowed us to project to the rest of the business world our intention to remain committed to these principles and our values, while challenging our suppliers and customers to do the same.

If you would like to know more about UN Global Compact or have questions about Fitesa’s commitment to the Compact, contact our Global Director of QA, HS&E, MS and Process Improvement, Anders Fogelberg.
