

Engineering Solutions Lifesaving Products

Improving Efficiencies. Protecting Assets. Saving Lives.

For over 50 years, QinetiQ North America (QNA) has been providing world-class engineering research and development and revolutionary products to the defense, security and commercial markets. Customers, worldwide, rely on QNA to increase readiness and situational awareness, improve manufacturing processes, streamline operations, reduce costs, protect people and assets and even save lives.

Our Heritage

In 1956, QinetiQ North America originated as Foster-Miller, Inc. residing in Waltham, MA. In 2004, QinetiQ acquired Foster-Miller becoming QinetiQ North America. QinetiQ North America then became part of QinetiQ Group PLC (QQ: LSE), one of the world's leading defense and security technology companies located in the United Kingdom. We pride ourselves in developing, delivering and supporting a portfolio of industry-leading products that has been used and tested for decades.

Our Expertise and Product Solutions

- Robotics/unmanned systems
- Military Soldier and Vehicle Protection Systems
- Maritime Systems
- Meteorological Sensors
- Utility Monitoring Sensors
- Manufacturing Process Improvement

Accomplishments

- In the past 15 years, over 4,500 QNA robots have been sold to 36 countries.
- Our TALON® robot has assisted in complex and threatening military and civilian missions since 2005.
- Q-NET®, QNA'S RPG protective net is the most widely-deployed RPG protection system in the world.
- More than 19,000 EARS® SWATS® gunshot localization system units have been sold to 11 allied nations.
- Since 1995, our LAST ARMOR® has been used by 16 allied countries and installed in over 40 different aircraft platforms deployed around the world.
- Our advanced naval control systems are installed in the most modern aircraft carriers in the world.
