What are EV veneers?

EV veneers are real wood, engineered through a process that creates uniformity and consistency and in this case linear grain pattern ideal for the Biarritz design.

Note: If using with our veneered linings, architrave or skirting the grain pattern will be different.

Bespoke Painted Ash Doors

To accommodate the growing popularity of internal doors with professional paint finishes, we are now able to offer many of our most popular contemporary designs, veneered in open grain Ash, then spray finished to any RAL colour.

The beauty of spray finishing over the Ash veneer is that the stunning natural open grain detail is subtly highlighted to great effect.

These doors can be produced to almost any size or design in both standard and fire-rated versions with complementary glazed options also available.

Choose from any RAL colour
(Minimum order quantity of 12 per order)

If you have something specific in mind, please choose from the RAL colour system - charts can be purchased online from www.ralcolour.com.

Our 3 most popular colours (No minimum order quantity)

Door Lining Kits

We can produce bespoke door lining kits from as little as 75mm in width up to 220mm subject to a 40% surcharge over our standard variants.

Architrave

Bespoke architrave can be produced in lengths of up to 4.2m and between 50mm and 144mm in width subject to a per linear metre surcharge of 40% over our standard linear metre variants.

Skirting Board

Both traditional and contemporary bespoke architrave designs can be manufactured in lengths of up to 4.2m and in heights of between 50mm and 245mm. A surcharge of 40% will be levied for this service over our standard variants.

Please Note: Should you require any moulding or lining outside of the sizes quoted above, please speak to one of our Door Experts. P.O.A.

Can't find what you are looking for?

If you can't find the style, height, width or even timber veneer that you are looking for then why not consider our bespoke moulding service?

Many different styles are available in popular veneers such as Oak, Walnut, Grey Coto, Dark Oak and even Black Ash.

You can also, within reason, design your own skirting and architrave styles to suit your exact requirements.

Basic FD30 Fire Door Liner

A basic hardwood fire door lining kit is also available. 150mm x 32mm to suit doors up to 838mm wide, complete with door stop and pre-grooved to accept 15mm x 4mm intumescent strips (sold separately).

150mm wide kit: HWFCDL150 £119

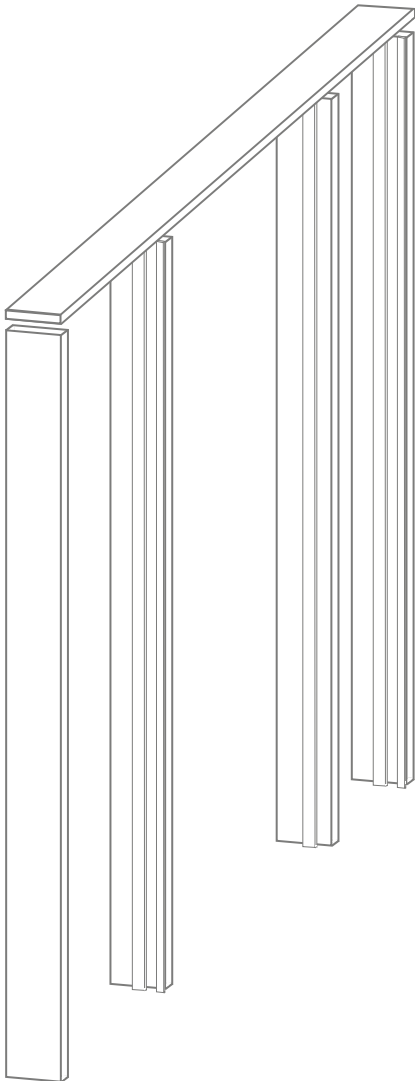

Intumescent Strips

Now available in Brown, White, Black, Grey and also Oak & Walnut effect.

Options include both a fire only or fire and smoke intumescent.

Sold in lengths of 2100mm x 15mm x 4mm.

- These component based Room Divider Frame Kits are supplied in untreated Oak veneer.
- Designed to suit wall thicknesses of 150mm.
- These kits require machining and adjusting by a skilled carpenter as all components are supplied oversized to enable the kit to be used for a variety of opening sizes.
- Each kit comprises 18 component parts which include:
 - » 1 x 3000mm x 150mm x 30mm Head Liner
 - » 2 x 2100mm x 150mm x 30mm Outer Liners
 - » 2 x 2100mm x 150mm x 40mm Supporting Legs
 - » 8 x 2100mm x 45mm x 12mm Door Stops
 - » 5 x 2100mm x 15mm x 12mm Mini Stops
- When assembled, the maximum structural opening size that these kits will accommodate would be 3000mm wide x 2130mm high.

Double Run 50

If you are looking for a value for money space saving door system then the Wardrobe Double 50 may well be the perfect solution for you.

It is a tophung system that can accommodate 2 doors weighing up to 50kg each which slide one door in front of the other.

As the name suggests, this system was designed for use with wardrobe doors but, given its huge weight bearing capability, can easily cope with any of our standard 35/40mm internal doors.

Opening Width	Part Number	Price
up to 1200mm	WD50-12	£45
up to 1500mm	WD50-15	£49
up to 1800mm	WD50-18	£53
up to 2400mm	WD50-24	£72

Single Run 60

Single Run 60 is the most versatile of all of our entry level sliding door systems and has been designed and developed with long life, stability and high capacity in mind.

It is a tophung system that accommodates 1 door weighing up to 60kg which slides to the left or right hand side.

Should you wish to create an extra wide opening and have a pair of doors which slide together, meeting in the middle of the opening, then 2 kits can be purchased and assembled to achieve this.

Opening Width	Part Number	Price
up to 2000mm	SR60-20	£77
up to 3000mm	SR60-30	£94

Interfold 35

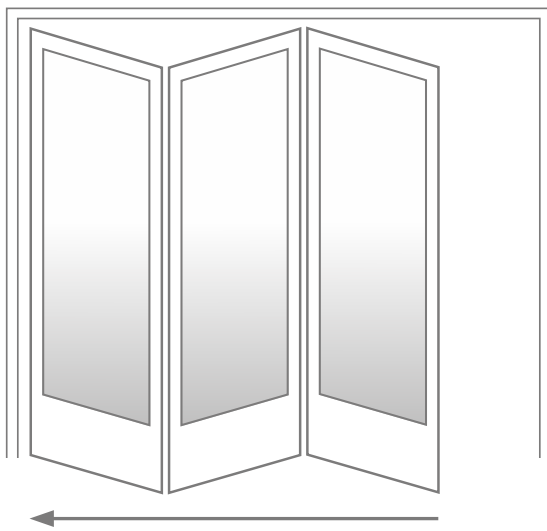

We can tailor a bi-fold system specifically to your individual needs with up to a maximum of 6 doors of no more than 35kg each folding/sliding in each direction and opening inwards or outwards. A heavy duty system which will work with doors up to 50kg in weight is available on request.

For further information and pricing, please speak to one of our Door Experts.

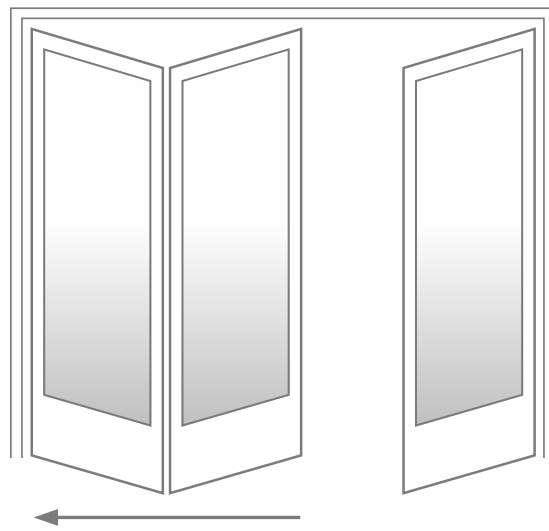

Popular System Configurations

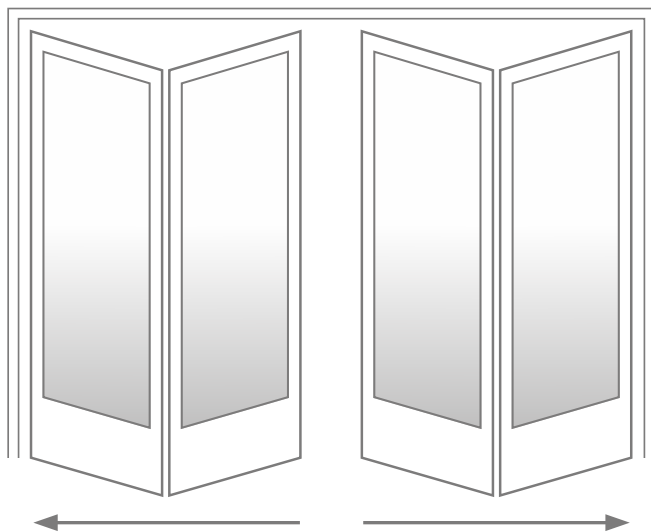

3 Doors One Way

2 Doors One Way - 1 Door One Way

2 Doors Each Way

Please Note: Doors are not included in the price of the system.

Our pocket door system kits are a simple way to increase available space in many domestic applications, particularly dining rooms, en-suite bathrooms, cloakrooms and doors into kitchens.

These systems are suitable for flush doors with a thickness of between 35mm and 44mm when using the frame adaptor kit provided.

The pocket door systems are supplied in kit form with all of the components listed below:

- 4 x Steel wrapped studs.
- 2 x Stud foot brackets.
- 2 x Wheel hangers.
- 2 x Hanger mounting plates.
- 1 x Rubber door stops.
- 2 x Nylon door guides.
- 1 x Adaptor kit.
- 1 x Fixing kit.

Intumescent Protection Packs - Door furniture such as latches, locks, bolts and hinges are essential components of many FD30 rated fire doors. The "cutting in" of these components introduces weakness in the door's overall performance unless additional protection is applied. This weakness is due to the premature burn through at the positions of door furniture and has been recognised officially in BS8214:2008 testing.

Bespoke Spray Finishing Facilities

We have a purpose-built spraying and drying room at our St Albans premises and this allows us to prepare and finish internal and external doors to a magnificent standard in a wide range of colours.

We are able to over-paint doors that are provided factory finished and may even be able to change the colour of the door during this process.

Remember that you will often need to trim a door during fitting and any areas that are worked on will need refinishing on site by your tradesman to reseal the door correctly.

We are happy to spray any number of doors with our pricing below reflecting cost savings based upon the efficiencies seen when finishing multiple doors in the same paint or stain colour.

Finishing Prices - Internal doors

The prices indicated below are for finishing in our standard, stocked, paint and stain finishes:

DOOR QTY	CODE	PRICE (Each)
1 - 2 doors (charge per door)	FINCODE8	£105.00 (Each)
3 - 5 doors (charge per door)	FINCODE9	£90.00 (Each)
6 + doors (charge per door)	FINCODE10	£75.00 (Each)

Please Note: Pricing is the same for clear lacquer, stain and lacquer or standard paint colours inc White.

Carpentry Services Price List

Description	Qty	Price
Rebating of standard 35mm & 40mm doors.	Per Pair	£49 per pair
Rebating of 44mm FD30 fire doors.	Per Pair	£64 per pair
Deluxe White Primed (2 coats) OR Clear Lacquer (2 coats) OR Stain & Lacquer (1+2 coats).	1-2 Doors	£105 per door
Deluxe White Primed (2 coats) OR Clear Lacquer (2 coats) OR Stain & Lacquer (1+2 coats).	3-5 Doors	£90 per door
Deluxe White Primed (2 coats) OR Clear Lacquer (2 coats) OR Stain & Lacquer (1+2 coats).	6+ Doors	£75 per door

Please note that the following Conditions of Sale should be read in conjunction with the “Finishing, Care & Maintenance Instructions” which can be found within our brochures, on our website and within the packaging of all our doors.

CHECK YOUR GOODS

From the point of delivery by us or collection you have 3 working days to check your goods.

Within 3 Days You Must:

- Detail any damage you observe to the packaging of the goods or to the goods themselves on the delivery/collection note.
- Check that the goods delivered match your order exactly including the size ordered.
- Remove all packaging and check every delivered/collected item for damage and/or manufacturing faults. Do not assume that a perfectly wrapped door is in perfect condition.

It is important that you thoroughly check your doors for any of the following potential faults, prior to commencing any alterations **AND BEFORE BOOKING A TRADESMAN:**

- Visible damage i.e. scratches, dents or chips.
- Warping or bowing beyond a 4mm tolerance.
- Scratches on glass (if supplied).
- Wrong door model or size supplied.
- Two odd doors supplied where the order specifically specified a matching pair.

The above are examples of potential faults/errors but this list is not exhaustive. Please also note that our Factory Pre-Finished Doors should not have any visible defects or damages when viewed in natural daylight from a distance of 0.5 metres or above. In rooms where there is no daylight scratches should be viewed in artificial light from a fixed wall or ceiling outlets **NOT** from portable equipment such as a torch. (As per N.H.B.C. guidelines).

DO NOT THROW AWAY THE “Finishing, Care & Maintenance Instructions” LEAFLET WITHIN YOUR DOOR’S PACKAGING.

This provides critical information and instruction for whomever is preparing or fitting your door and guidance to ensure you will remain happy with your door in the coming years.

If your delivery has been made by courier please note that once you have signed the receipt confirming that the goods have arrived in good condition, we are not able to progress any claim for damaged products. We cannot proceed with a damage claim if you have written “Unchecked” on the Delivery Note; you **MUST** thoroughly check the entire delivery before signing as accepting the goods. A courier delivery is made by a third party to the kerbside and will require on-site labour to move the doors into the house/site. Delivery by Todd Doors’ liveried vehicles is made to the ground floor of the property. Please Note: by fitting, finishing or making any

alterations, the doors will be deemed to have been accepted as supplied. No claims – either relating to damage or faulty manufacture – will be entertained on any product that has been altered in **ANY** way. It is up to **YOU**, the customer to check the goods **NOT** the person fitting the products.

STORAGE & INSTALLATION

You Must:

- Ensure prior to fitting that all doors are stored in a cool, dry atmosphere and kept flat.
- Only fit Internal doors internally.
- Only fit External doors externally.
- Ensure doors are not hung in damp or newly plastered rooms and exercise caution when fitting on newly screeded floors or when the doors will be exposed to extremes of heat or humidity, i.e. conservatories, close to radiators, inside double-glazed porches etc.
- Doors fitted on kitchens and bathrooms should be well-ventilated to prevent prolonged periods of exposure to moisture.

PLEASE NOTE: WE WILL NOT BE HELD RESPONSIBLE FOR ANY DAMAGE CAUSED, FOR EXAMPLE SPLITTING, CRACKING ETC., IF DOORS HAVE BEEN HUNG AND NOT PROPERLY PROTECTED FROM MOISTURE PENETRATION.

CONDITIONS OF SALE

We have tried to provide a lot of information as clearly as possible, but if you have any questions regarding our Conditions of Sale please do call one of our Door Experts.

- Our Sales Contract is with the named person or Company on the sales Order Acknowledgment and the Guarantee is also solely applicable to this person or Company – it is not transferrable.
- All items must be paid for in full prior to delivery or collection unless account facilities are in place. **(By opening an Account with us you have agreed to be bound by our payment terms).** The title of goods remains with Todd Doors Ltd. until full payment has been made.
- We shall not be held responsible for any incidental work or expenses arising due to any defect in our product or failure to deliver within an estimated time frame. In the event of goods proving to be **defective (manufacturer’s defect only) which need replacement, our liability shall not exceed the replacement of faulty goods.**
- We reserve the right to return to stock and withhold all monies paid on any goods not collected within 2 weeks of them becoming available.

- Orders are non-cancellable and non-refundable once an order has been confirmed and cannot be amended unless by mutual agreement.
- All refunds are entirely at the discretion of the Manager on duty. Should a refund be authorized, a handling charge of a minimum 25% of the purchase price will be applied, and the goods must be returned in perfect condition, with complete original packaging and proof of purchase. Refunds will only be considered within 1 month of the date of sale.
- Leadtimes are estimates and not a firm date of arrival for goods. Various factors affect the supply of goods.
- Due to the vagaries of the printing process and the natural qualities of timber, colours in our catalogue are for guidance and may not be exactly replicated in the final product.
- Todd Doors Ltd. reserves the right to alter our manufacturing suppliers, construction methods and price without notice.
- All of our internal and external doors benefit from a five year guarantee (so long as the "Finishing, Care & Maintenance Instructions" have been followed). Our guarantee applies to the person/company who has purchased the door/s from us and is not transferrable.
- If you are unhappy in any way with a product of ours, or believe a product to be defective or faulty, then please contact our Customer Services Department:

WE CANNOT BE HELD RESPONSIBLE FOR THE FAILURE TO SUPPLY WITHIN AN ESTIMATED LEADTIME AND YOU SHOULD NOT BOOK A TRADESMAN UNTIL YOU HAVE RECEIVED AND FULLY CHECKED YOUR GOODS.

- email: customerservices@todd-doors.co.uk
- Telephone: 0808 164 0072
- In writing: Customer Services, Todd Doors Ltd, 28 Soothouse Spring, St Albans AL3 6PF

- We will keep you up to date with any changes in the progress of your order. If your order is particularly time critical, please notify us in writing of your time-frame and we will confirm whether we accept your order on this basis.
- Whilst we will make every effort to accommodate your preferred delivery date, this is not always feasible. We will however do our utmost to deliver as close to your desired date as possible.
- Made-to-order/tailor-made/bespoke items are non-cancellable and non-refundable once an order has been confirmed and therefore cannot be amended unless by mutual agreement.
- In the case of made-to-order/tailor-made/bespoke items a deposit of at least 50% of the total value including VAT is required at the time of ordering. Should any items no longer be required, the deposit will be retained and the balance owing invoiced for settlement within 28 days of date of invoice.
- We cannot guarantee continuity in product (i.e. timber colour, grain, panel sizes etc. may vary). To avoid mis-matching products please order all goods for a project in one go.
- Due to circumstances beyond our control prices may be altered up or down.
- Prices of individual products do not include delivery charges (where applicable).
- We accept orders from all over the world but ask that you arrange your courier/shipping for destinations outside of the UK. On signing for the product(s) at the point of collection or delivery, your agent is confirming as your representative that the goods have been provided satisfactorily. Nb. Our guarantee is not valid for products once they are outside of mainland UK.
- If any mistakes are made through human error we will do our utmost to rectify them as quickly as possible.

In the event that you are not satisfied with the outcome of any complaint, under the Alternative Dispute Resolution ("ADR") you have the right to raise your concerns with an ADR body, who are approved and regulated by the Trading Standards Institute - we would therefore refer you to the Small Claims Mediation Service.

ORDERS MADE VIA OUR WEBSITE OR TELEPHONE

Please refer to our complete Website Returns Policy which can be found at:
www.todd-doors.co.uk/returns-policy

TODD DOORS ENGINEERED INTERNAL DOORS

If you have bought, or are considering buying one of our Engineered Interior Doors, please read on. We have tried to make the following text as clear as possible and in plain English.

Todd Doors takes pride in sourcing the very best products to cater for the widest range of tastes. The wood used in our doors all comes from sustainable forests and great care has been taken to only use factories who adhere to European Timber Regulations, and therefore the quality of raw materials used ensures that your door will give many years of good service. An Engineered Interior door will be constructed typically using a combination of man-made and natural materials and relies upon being installed and finished correctly and subsequently maintained to maximise its longevity and to ensure that it looks good for many years. In some environments, our doors may not be suitable and as we would rather you be aware of this we have written the following guidance to enable you to make an informed decision about your purchase and to gently educate you as to what you can expect by way of additional finishing that may be required straight after installation and ongoing maintenance

Reminder: If you have already purchased one of our doors, please check your goods and let us know about any issues within 3 working days. If you fit, finish or make any alterations to your door you will be deemed to have accepted the goods as supplied. If in doubt about this, please check our Terms & Conditions of Sale which can be found on the back of all forms of your paperwork, on our web site and within all of our brochures.

PRESERVING CRAFTSMANSHIP

Installing your door in an appropriate location and when conditions within the property are right Any door is most at risk from failure when exposed to extremes of heat or humidity. In newly built properties or properties that are being renovated where walls have been freshly plastered, it is important to wait until the moisture levels have normalised and the environment where the door is to be installed is fully dry. If a door is installed in a damp or newly plastered room, it is possible for the components that make up the door to absorb moisture and swell at different rates and in turn crack or split. This would most commonly happen along the line where the lipping of the door joins the face but can also happen in a variety of places on a door.

In much the same way, if the door is positioned in areas of extreme heat such as close to a radiator, in a boiler room or cupboard containing a hot water cylinder, in a utility room or wet room for example, consideration for how the door may react should be taken.

Doors that are fitted in these and similar circumstances would not be covered by our guarantee should they fail. This applies for both manufacturing defects, poor workmanship and any factory applied finish.

MAKING ALTERATIONS

Nearly all of our doors contain “lippings” on the edges, which are made from solid wood. The lippings enable you to trim the door to make it fill most gaps and still fit hinges to the edge. The maximum that each door or

“leaf” can be trimmed is dependent on type of door, size of lipping and how the door has been constructed. Our doors are either Solid-core construction or Semi-solid construction; in Semi-solid doors there may be some hollow areas within the core of Particleboard or MDF to make it lighter and cheaper to produce. Solid-core doors don’t have any hollow areas, but for clarity, they are not made of solid timber, they just don’t have any voids in their MDF or particleboard core. We do not stock Hollow core doors as they are typically very lightweight and easily damaged.

Fitting into an existing frame and trimming (NON Fire Doors): If fitting a Non Fire Rated (typically 35mm or 40mm thick) Engineered Interior Door into an existing frame and the door leaf requires trimming, the maximum that the door can be trimmed from each of the four sides is typically **6mm**. Trimming over 6mm may be possible but the lipping will be substantially weakened and any work of this nature would be at the installer or end user’s risk. Trimmed edges must be finished / re-finished and brought up to the same standard of finish as the rest of the door. Failure to do this will invalidate your guarantee.

Fitting into an existing frame and trimming (Fire Doors): If fitting a Fire Rated Engineered Interior Door into an existing frame and the door leaf requires trimming, the maximum that the door can be trimmed from each of the four sides is typically 3mm. Trimming over **3mm** may be possible but would require verification by referencing the Fire Test Report that we keep on file, specific to each particular fire door. Please contact our Customer Service Team at the contact details listed below for any advice with regards the installation of a fire door. If a fire door is reduced in width or height in any way, trimmed edges must be finished / re-finished and brought up to the same standard of finish as the rest of the door. Failure to do this will invalidate your guarantee.

FINISHING AND MAINTAINING YOUR DOOR

Please be aware that we offer our doors in a variety of states of finish:

- Untreated - left in a ‘bare’ state, ready for the end user to apply either a paint or stain finish.
- Primed - supplied coated with a basic one or two coats of primer, but in need of further preparation (sanding, caulking and filling) and undercoating before any final or top coats are applied by the end user.
- Deluxe Primed - Primed but to a much higher standard, with greater attention to detail and sometimes a finish so good that customers choose not to apply a final top coat (note that for doors sited near to moisture sources - bathrooms / kitchens etc. - we would always recommend that a final top coat be applied).
- Pre-Finished - generally fully finished in either a spray lacquered or painted state, leaving the end user very little to do post installation.

Whatever level of finish you choose to buy your door in, it is always the case that immediately after the door has been installed, Untreated and Primed doors must have their final coats of finish applied and with ALL doors, irrespective of what level of finish they have been sold with, if the edges, top or bottom have been

trimmed in any way, it is vital that these surfaces are not left in the bare state, but brought up to the same standard of finish as the rest of the door. Failure to do this will invalidate your guarantee.

Please note that we offer a full finishing service in paint and stain finishes for any of our doors – please speak to one of our Door Experts for more details.

Our doors can be treated with either Water or Solvent borne finishes but care should always be taken to not saturate the door when applying the first coat of any finish. This could cause a veneer to lift as the saturated timber swells and breaks the glue bond, forming a ‘bubble’ in the veneer. Should this happen, leave the door to dry out and there is every chance the bubble will disappear. If it doesn’t, a skilled decorator should be able to slice or puncture the bubble, squeeze a small amount of glue into the cavity and with the door lying flat, leave a weighted block on the bubble, with a layer of plastic sheet underneath so the block doesn’t stick to any glue residue, flattening it until the glue has set.

For a natural look, some customers prefer to ‘oil’ a door. For nearly all of our doors, this is not an issue and we would honour any guarantee claims. However, on our Oak FLB door, due to the high level of solid timber in this door, we cannot guarantee it unless it has been fully sealed with a water or solvent based paint or varnish. Oiling the Oak FLB door invalidates their guarantee.

Levels of ongoing maintenance will vary depending on the degree of usage and location in which a door has been installed. If you are unsure how to re-finish or maintain your door in years to come, we would suggest that you have the door inspected by a qualified decorator and seek their advice and guidance.

GUARANTEE

We guarantee that our Todd Doors Engineered Interior Doors will be free from defects in materials or workmanship from the date of purchase for a period of five years, so long as it is treated and maintained as instructed.

We guarantee against total failure of the factory pre-finish on our Todd Door Engineered Interior Doors for one year subject to installation in line with our instructions as detailed above (and compliance with our Terms & Conditions of Sale).

HOW TO GET ASSISTANCE

If you have a problem with your Todd Doors Engineered Interior Door, immediately upon discovery contact our Customer Service Team:

- email: customerservices@todd-doors.co.uk
- Telephone: 0808 164 0072
- In writing: Customer Services, Todd Doors Ltd, 28 Soothouse Spring, St Albans AL3 6PF

We can respond quickly and efficiently if you provide us with the date of purchase, your order or invoice number, how to contact you and a description of the problem and the product, including photographs.

WHAT WE WILL DO

Upon receiving your notification, we will send out a form for you to complete within three business days of receipt to the contact identified. We will investigate your claim and take appropriate action within 30 days of receipt of notification (but normally much quicker). If it is suspected that our product does not have a defect covered by the warranty, we may charge an upfront inspection fee for an onsite inspection that is required or requested by you to cover our labour and travel costs. If it is determined that there is a defect, the inspection fee will be refunded and we will either arrange to repair the door on-site, offer an allowance in compensation or supply a replacement door (this would be charged for until such time as the faulty door is either returned to us or collected by us, at which point the charge for the replacement door would be refunded). If we are unable to provide a replacement and repair is not practical or cannot be made within a suitable timeframe, then we will refund the purchase price, having made allowance of a reasonable amount to cover the length of usage the product has already given (typically at 20% per year).

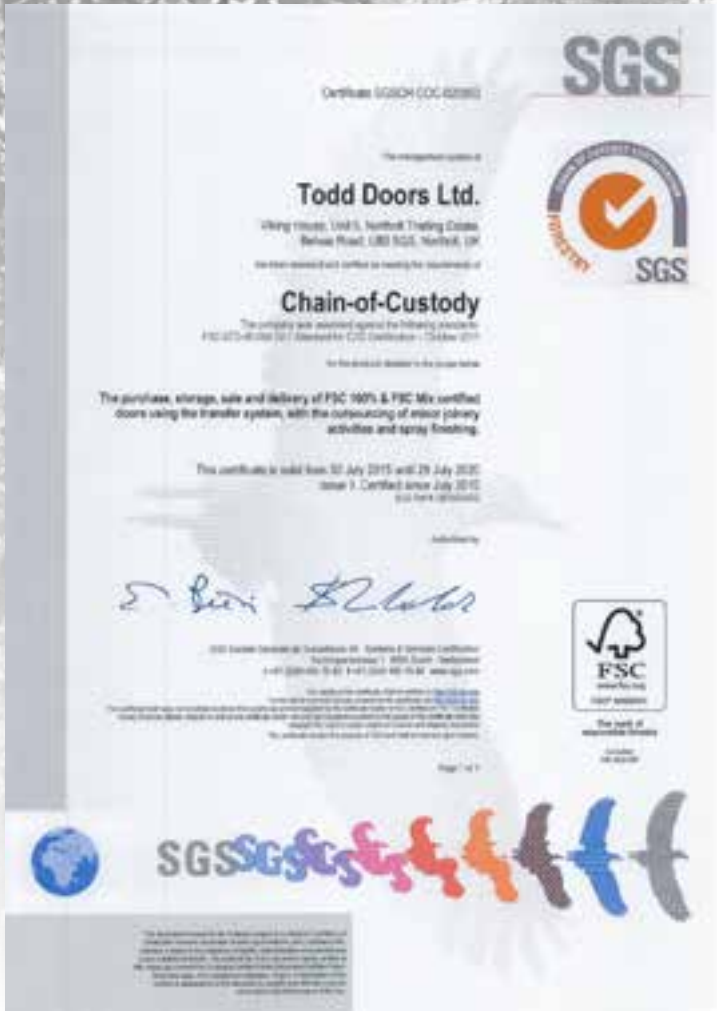

If the claimed non-conformity is a warp or bow, we may defer repairing or replacing the door panel for a period of up to twelve months from the date of claim. It is not uncommon for a temporary warp condition to occur as the door panel adjusts to local humidity and temperature conditions. This deferral will not be counted against the warranty period.

WHAT THIS GUARANTEE DOES NOT COVER

Todd Doors will not be held liable for:

- Warp / bowing for any 915mm wide by 2134mm high by 35mm, 40mm or 44mm or smaller door panel, which does not exceed 6mm in the plane of the door panel itself.
- Problems due to misuse, abuse, failure to follow the Finishing, Care & Maintenance Instructions or as a result of any cause beyond our control (e.g. fire, flood, extremes of temperature, other acts of nature, and acts of third parties outside of our control).
- Problems related to improper finishing and /or the use of an inappropriate product on any/all surfaces (front and back) and edges (top, bottom, and sides) of the door.
- Bow or misalignment in the frame or jamb in which the door panel is hung.
- Incidental or consequential damages to include but not limited to: cost of labour for installation, removal or refinishing of the replacement door or component.
- Slight expansion or contraction due to varying environmental conditions, panel movement (shrinkage) of 6mm or less due to temperature and humidity.
- Black or dark staining of the timber due to moisture ingress which commonly occurs in Oak Timber products.

FSC & PEFC

Responsible Purchasing Policy

Todd Doors are fully committed to sourcing products from sustainable and well managed forests and as such have implemented a robust and well managed due diligence system under the European Union Timber Regulations (EUTR) which became law in March 2013. Many people are now quite understandably concerned about the origin of the products they are purchasing. You can be wholly confident that when purchasing a door through Todd Doors, this rigorous check has taken place and that all Todd Doors products comply with European Union Timber Regulations.

However at Todd Doors we have decided to take this a step further. We have now produced a range of products that are FSC and PEFC accredited and we are continuing to expand our range of products under these standards.

What is FSC and PEFC?

The Forest Stewardship Council (FSC) and The Programme for the Endorsement of Forest Certification (PEFC) are both internationally known, not for-profit organizations that promote sustainable forest management, environmentally friendly material sourcing and socially beneficial forest management through independent third party certification.

These bodies work to maintain the highest levels of sustainable forest management, ensuring that the harvest of timber and non-timber products maintains the forest's biodiversity, productivity, and ecological processes.

Why choose FSC and PEFC?

Forests are among the most bio-diverse and valuable ecosystems on the planet. They provide a full range of ecosystem services including food, medicines, biomass and wood. They help to maintain climate regulation as a key stage in the world's global water cycle and provide habitats and shelter for people and wildlife.

Without forests, many of the everyday products and services we use would be completely lost, while many of the species which depend on forests would also suffer or disappear. At Todd Doors we believe in helping to maintain sustainability and wish to provide quality products, responsibly sourced, creating a better purchase for our customers and a better world for everyone else.

What is next?

We aim to continue the expansion of our FSC and PEFC range from 2018, and hope to have a larger more diverse portfolio of products with these respected accreditations.

COMPREHENSIVE PRICE MATCH GUARANTEE

Huge amounts of time and effort are spent at Todd Doors making sure that our ranges of doors and ironmongery meet our very high standards whilst offering our customers exceptional choice but, most importantly, value for money. As a result we are so confident of our products and pricing that we offer a comprehensive Price Match Guarantee across all of our products.

“ If you find the same product cheaper within 7 days of placing your order and our competitor has the product in stock, we will refund you the difference ”

Terms & Conditions

The competitors' product must be of the same size, design and construction/material, be in stock and supplied finished to the same standard or finish as the Todd Doors product. With regard to branded ironmongery, evidence must be supplied to verify that it has the same manufacturer's part number.

Claims need to be submitted in writing to pmg@todd-doors.co.uk with details of the supplier, door or ironmongery type, door size or manufacturer's part number (if branded ironmongery) and how it is finished along with evidence of the quoted price and availability. We will then fully investigate the claim and reply to you within a maximum of 5 days - should a refund be due it will be processed within a maximum of 10 days of our decision being communicated to you.

Due to the volatility of pricing and the competitive nature of the associated products, our Price Match Guarantee is based on our best current pricing available in-store and online, not prices in our brochures.

GENUINE CUSTOMER FEEDBACK

Todd Doors have been working with Feefo for over 3 years now, generating genuine customer feedback that our customers can rely upon.

With over 500 genuine reviews received over the last 12 months we have been awarded, by our customers, 4.5 stars out of a possible 5 stars with over 89% of them being 4 stars or above.

We are delighted to announce that we have been awarded the Gold Feefo Trusted Merchant Accreditation 2018. This accreditation was awarded to us as a direct result of independent feedback left by genuine shoppers, like you, who have consistently scored our service and products highly throughout the year.

Visit us in Store :

You can visit one of four inspirational UK stores, in London, Bournemouth, Hertfordshire and Buckinghamshire. There you can see, touch and even smell our beautiful products first-hand.

Find us at todd-doors.co.uk :

Online you'll find us 24 hours a day at todd-doors.co.uk. Our website is accessible via PC/Laptop, Tablet device and soon mobiles too. Our very best prices and offers can also be found here!
