

## Description

The MK11 Gecko Marine Safety Helmet has been brought about by the company's endeavours to provide the best possible level of protection and comfort for the user, based on feedback gained from previous models and current users.

The Gecko Open Face is the first helmet in the world designed from the water up to provide the most suitable protection for use in the marine environment.

Gecko helmets are the only B.S.I. approved Marine Safety Helmets in the world.

## Design

Using computer aided design the ABS construction provides protection and interaction with existing equipment including dry suit, life jacket etc. The Lightweight grooved design gives excellent strength to weight ratio.

The patented inflatable liner is an integral part of the helmet design. Through an oral valve, the liner has the ability to inflate or deflate accommodating the user's head size. This system allows the 'tension of the fit' to be adjusted according to the situation, resulting in increased comfort, additional buoyancy, and improved heat retention.

## Specifications

Size: 56cm – 63cm

Weight: 670grms

Certification:

Marine Safety Helmet PAS 028:2002

Mountaineering Helmet EN 12492

Eye Protection BS4110  
with compatible visor

Ear Defence EN352-2  
with equivalent ear plugs
