

## INTEGRATED LIGHTING

Optelma experienced the most successful Surface Design Show to date, with a bumper number of visitors to the stand and the highest enquiry numbers in the four years that Optelma having been exhibiting the Atelier Sedap Plaster lighting range. Optelma Architectural Lighting have partnered with Atelier Sedap for over three decades, pairing quality plaster mouldings with the latest lighting technology. This partnership creates an exquisite product range that allows designers to integrate lighting into the design of a room or space. By using silicon moulds with fibre infused plaster the finish is perfect each time and provides a solution that plastering alone could not achieve. It also allows details such as coves and cornices to include design features not normally possible. Optelma can not only provide the supply of lighting products but actively get involved in the design and support of the project to insure any product specified looks good but also gives the correct lighting effect.

## BESPOKE DECORATIVE FINISHES

DKT Artworks is a London-based company, specialising in the design and production of bespoke artworks and decorative finishes. Working with the most internationally renowned interior designers, DKT Artworks has been involved on prestigious residential, commercial and marine project worldwide. The Company champions the continued relevance of traditional hand-produced arts and crafts within the contemporary interior environment, at the same time expanding into new territory with modern techniques and computer based-skills, and significantly broadening and enriching its repertoire. DKT Artworks' impressive portfolio includes murals & trompe l'oeil, handcrafted mosaics, painted and gilded surfaces, verre églomisé, sculpture and bas-relief. DKT Artworks' enduring creativity and consistent quality as well as its hard-earned reputation for imaginative and original interpretations of design concepts has proved undeniably popular in the years it has been operating. Collaborating with like-minded, quality conscious companies in the fields of manufacturing, technology and crafts, allows DKT Artworks to access a range of techniques and materials, and offer an infinite range of bespoke finishes, from antique or traditional to contemporary and cutting-edge.

This unique creative approach and breadth of knowledge is evident in the quality of work exhibited at this year's Surface Design Show, which featured DKT Artworks' Asagao modular tile system along with other bespoke works. These elegant, dynamic patterns can be cast in a number of materials and embellished in a variety of ways. Asagao was designed and produced in-house and would make a stunning feature in a range of interior settings and projects.
