Aviation heroes wanted

Growth for digital aviation: Lufthansa Systems is looking for IT specialists

Raunheim, August 15, 2018 – Lufthansa Systems supports airlines worldwide in all their processes with digital solutions – from network and route planning to booking and revenue management systems to on-board navigation and entertainment solutions. The digitalization of the aviation industry is proceeding rapidly, resulting in a continued growth of the demand for expertise in this field. The Lufthansa subsidiary based in Raunheim near Frankfurt am Main is therefore seeking reinforcements: aviation heroes with IT superpowers.

“Working at Lufthansa Systems means actively shaping the future of aviation with smart IT solutions. As I see it, it has become relatively easy to develop something like an app. The challenge lies in integrating innovative new solutions into existing system landscapes and structures. Some airline processes are very complex. Thanks to our years of experience, we have an extreme competitive advantage here. And this benefits not just the Lufthansa Group, but also our more than 350 airline customers worldwide,” said Olivier Krüger, CEO of Lufthansa Systems.

Lufthansa Systems is looking for specialists in a variety of areas, from newcomers to experienced professionals, from software architects, data scientists and DevOps specialists to scrum masters and product owners. But along with IT specialists, the company is also seeking consultants and aeronauts as well as mathematicians and physicists. “With us, anyone can develop their full potential as an aviation hero,” Krüger says.

Reinforcements are needed at the headquarters in Raunheim and at the other two German offices in Berlin and Hamburg. Close cooperation with sites in 16 other countries and customers all over the world ensure an international environment and exciting, varied projects.

Agile methods such as scrum and design thinking, flat hierarchies and flexible working hours are the hallmarks of the working world at Lufthansa Systems. The company’s new

headquarters at Airport Garden in Raunheim, one of the most cutting-edge buildings in the Lufthansa Group, is the perfect setting for implementing this modern work concept in an open atmosphere and for promoting communication and teamwork.

A variety of services for employees, an internal innovation management system and the benefits of the Lufthansa Group complete the package.

Tanja Altmann, Head of Human Resources, presents Lufthansa Systems and the tasks for Aviation Heroes in a video, which can be found online together with further information on vacancies in IT at Lufthansa Systems: aviationheroes.lhsystems.com
