- Sand and dustproof locking swivel wheels
- Etched Primed and then powder coated to a colour of your choice
- Stainless Steel worktop
- Welded Stainless Steel handles
- Heavy duty tie down points
- Fully welded Stainless Steel carriage
- Customisable interiors

Rapid deployment when duty calls

Designed to meet demanding military specifications and provide a rugged solution for rapid deployment to even the toughest environments.

Used by the United States Air Force, amongst others, where rapid deployment is common place, and tools arriving fully functional is mission critical. The cabinet is ideal for storage, shipping & protection of equipment, each unit is fully customised to suit your exact needs.

Product Information

The bespoke manufacture of the cabinet is a joint venture, between PSJ Fabrications & Lista, offering maximum performance, efficiency, durability and mobility.

Starting with an unpainted Lista drawer unit, removed from its production line, we modify it at our UK factory. After modification each unit is etch primed, and powder coated in an architectural grade polyester powder paint system, to produce a mobile cabinet that is fully rust & corrosion proof.

The drawers have a load capacity of 200kg without the use of ball bearings therefore eliminating any possible FOD (Foreign Object Damage).

The cabinet comes as standard with a NATO hinged locking system offering, military grade security. Spring-loaded latch pins prevent accidental opening of drawers, with additional locking options available increasing the security further.

All drawers can be supplied with custom foam interiors and/or custom-made steel drawer dividers with individual slots and compartments for each piece of equipment, so any missing items can be easily identified. The stainless steel top provides additional workspace making the cabinet a complete workstation.

Rugged, lockable castors fitted to a fully welded stainless steel chassis provide a durable solution for quickly moving heavy and bulky equipment. The castors have been specially adapted to make them sand and dust proof allowing effortless mobility even in the toughest environments.

Who are PSJ?

PSJ Fabrications Ltd are a leading specialist in sheet metal design, fabrication and finishing, producing precision engineered components and equipment for a diverse range of industries.

Established in the 1960's and using state of the art equipment and the latest finishing technology, our skilled workforce is able to supply high-quality products in a wide range of materials, thicknesses and specifications. We have a close working relationship with Lista who's cabinets we use to modify into the military cabinet.

Fully customisable to any specification

The mobile cabinet is fully customisable and available in a wide range of sizes with any colour and finish to suit your requirements. Custom drawer configurations are also available as well as an extensive list of toolbox accessories. All units are shipped fully assembled and ready to use.

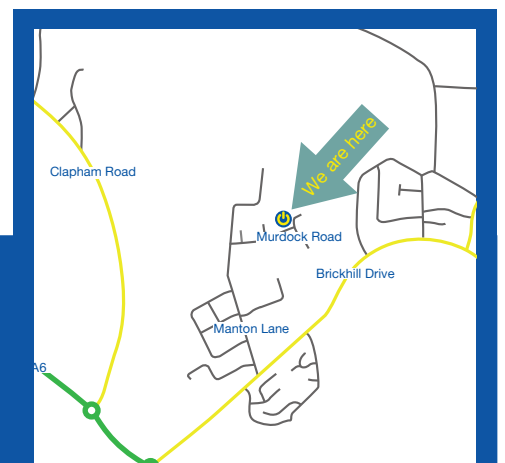

Vehicle towed option also available

The mobile cabinet can also be manufactured as a larger towable unit (as pictured below). It comes with run flat tires and heavy-duty chassis. The quality steering turntable allows for easy power towing and manoeuvrability.

Customer Testimonials

Thanks to PSJ Fabrications,
Best tool box seen to date.....
Priceless!!!!
