# SERVICE BULLETIN

CERTAINTY: IN CONCRETE

**SAFETY FIRST:** Always remove keys and lock off power before carrying out any maintenance

# CHAIN RAILS

## support your conveyor

Top chain rails help support the conveyor when carrying the aggregate load

Chain rails help to provide thousands of meters of production, but they will wear and need checking

Left unchecked, chain rails will waste and thin in size, causing serious problems if not replaced

New chain rails start life at 19mm in size

**TECH TIP**  
Check your chain rails as part of your bi-annual, complete mixer service
