FK - Technical Specifications

The FK recycling module can be combined with almost any of our rear loaders. The module comprises of a completely separate chamber body with a side-mounted bin lift integrated in the body. The roof hatches work automatically when emptying bins and module. Emptying the module is made easier by high tipping and side ways-shifting out from the chassis.

The FK module is also suitable for gas-powered chassis and can take two modules on the same chassis thanks to its compact design without pannier.

The recycling module combined with KGLS

	FK 2,2 m ³	FK 3,6 m ³	FK 4,8 m ³
Length	830 mm	1145 mm	1460 mm
Tipping height	1700 mm	1700 mm	1700 mm
Sideways	275 mm		
Maximum bin size	240 l	400 l	660 l
Weight	980 kg	1055 kg	1130 kg

The recycling module combined with the KG (-2B)(-2K) and the KGBH (-2B)(-2K)

	FK 2,6 m ³	FK 4,0 m ³	FK 5,3 m ³
Length	830 mm	1145 mm	1460 mm
Tipping height	1600 mm	1600 mm	1600 mm
Sideways	400 mm		
Maximum bin size	240 l	400 l	660 l
Weight	1030 kg	1105 kg	1180 kg

The recycling module combined with heavyweight KGH (H)

	FK 3,0 m ³	FK 4,5 m ³	FK 6,0 m ³
Length	830 mm	1145 mm	1460 mm
Tipping height	1500 mm	1500 mm	1500 mm
Sideways	600 mm		
Maximum bin size	240 l	400 l	660 l
Weight	1100 kg	1175 kg	1250 kg
