

A technical management service covering both procurement and component services for the Avon and RB211 Industrial Gas Turbine Engines.

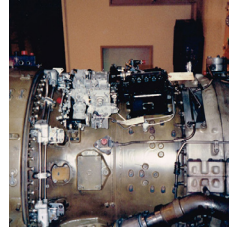

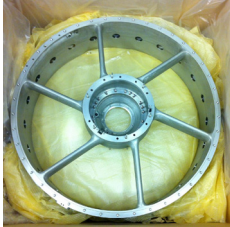

At Rolaar we're dedicated to assisting you in prolonging the life of your gas turbine engine and keeping lifecycle costs at a minimum. We supply OEM components and parts for the Rolls Royce Avon gas generator models 1533, 1534 and 1535 as well as the RB211 and Olympus engines. All parts have full traceability and are fully certified to ISO 9001:2008 standards for your total peace of mind.

Benefits of working with Rolaar Limited

- With approved vendor partnerships worldwide, Rolaar can source any component you need, whether it's a batch order or a one off purchase.
- Extensive industry knowledge supported by a comprehensive library system.
- We carry a large inventory of new, used and serviceable components for all Avon and RB211 Industrial Engines.
- We can cater source hard to obtain components that are not readily available.
- We provide competitive quotations for components, assemblies and Avon Tooling.
- As a small highly efficient company, we can react quickly to your requirements.
- We are registered with the Achilles UVDB community and the SAP Ariba Network.

Recognised Quality Standards

All work is undertaken in accordance with the O.E.M manual, repair schemes and modification requirements. We are able to service and test many engine components throughout all the separate stages.

The highest quality components manufactured by OEM companies - all in workable timeframes at affordable prices.

The Company philosophy is that wherever possible worn components should be repaired. This reduces the cost whilst maintaining quality and reliability.
